

A photograph of a woman and a young child in a forest during autumn. The woman, with long blonde hair, is crouching and smiling at the child. The child is wearing a dark blue coat and a plaid hat. They are surrounded by fallen yellow and orange leaves. A yellow and red tricycle is visible in the background. The scene is brightly lit, suggesting a sunny day.

D - Information on importance of encumbrance

The main source of encumbrance for Nordea is covered bond issuance programs where the required overcollateralization levels are defined according to the relevant statutory regimes. Other contributors to encumbrance are derivatives and repos where the activity is concentrated to Finland. Historically, the evolution of asset encumbrance for Nordea has been stable over time which illustrates the fact that the asset encumbrance for Nordea is a reflection of a structural phenomenon of the Scandinavian financial markets and savings behavior. Major part of the unencumbered assets are loans and the rest are equity instruments, debt securities and other assets.
