**Interim Report
1 January-30 September
2015**

The Finnvera Group's Interim Report for January–September 2015

An upswing in financing for ownership arrangements

By the end of September, Finnvera had financed considerably more company acquisitions than during the same period the year before. During the period under review, Finnvera was involved in over 700 changes of ownership. Finnvera's total contribution was EUR 106 million, or 80 per cent more than in the corresponding period in 2014. It is estimated that Finnvera is involved in every third company acquisition. The period under review was the first time after 2010 when the number of ownership arrangements showed an upswing.

According to the SME Barometer survey conducted this autumn, investment expectations have improved since last spring. As yet, however, no change is apparent in Finnvera's financing; as before, SME financing was needed for working capital considerably more than for investments. It is over three years since investments accounted for a larger share of financing offered to SMEs than working capital.

Business operations and the financial trend

During the period under review, the volume of export credit guarantee offers given by Finnvera was 52 per cent greater than in the corresponding period in 2014. As concerns financing offers for export credits, the figure was over two times greater. The volume of loans and guarantees granted to SMEs and enterprises larger than the SME definition applied by the EU was 31 per cent greater than the year before.

Finnvera Group

Capital adequacy, Tier 2	17.9%	18.6%
Cost-income ratio	25.5%	25.7%

The Finnvera Group's profit for the third quarter of 2015 was EUR 51 million, or EUR 23 million better than for the second quarter (28 million). The main factors improving the result were the reduction of EUR 19 million in impairment losses on receivables and guarantee losses, the reduction of EUR 5 million in losses from items carried at fair value, and the decrease of EUR 1 million in administrative expenses.

The Finnvera Group's profit for January-September totalled EUR 106 million (76 million), or EUR 30 million more than during the corresponding period in 2014. The main factors improving the financial performance for the past nine months were the decrease of EUR 27 million in impairment losses on receivables and guarantee losses, the increase of 5 per cent, or EUR 5 million, in the parent company Finnvera plc's fee and commission income, as well as the decrease of EUR 6 million in losses from items carried at fair value.

The parent company Finnvera plc's profit for January-September stood at EUR 108 million (84 million). The Group companies and associated companies had an effect of EUR -2 million on the profit (-9 million). Venture capital investments accounted for EUR -8 million (-9 million) of this effect. Interest equalisation and the financing of export credits by Finnish Export Credit Ltd accounted for EUR 6 million (0.5 million).

When the result is broken down by business sector, both the parent company's export financing and SME financing showed a profit for January-September: the separate result for export credit guarantees and special guarantees came to EUR 68 million (79 million), while the profit for credits and guarantees in SME financing was EUR 40 million (4 million).

Outlook for financing

In euros, the demand for SME financing was about one third greater than during the first nine months the year before. The growth was attributable above all to Finnvera's wider mandates, such as the possibility to finance enterprises larger than SMEs and to subscribe bonds. The volume of SME financing is expected to remain at a high level during the last quarter of the year as well.

Demand for export credit guarantees also continued strong during the third quarter and is expected to remain equally brisk until the end of the year. Country risks are always assessed when guarantee decisions are made; at present, a close eye is kept on economic trends in countries such as Russia and Brazil. These two countries together account for just under one quarter of all outstanding export credit guarantees.

According to the current estimate, the Finnvera Group's financial performance for 2015 is likely to be better than in 2014 because there have been fewer new impairment losses and provisions for losses than had been expected. In a similar estimate

made early in 2015, the financial performance was expected to fall below that in 2014. The uncertainty factors associated with economic trends make it difficult to predict financial performance. If more risks materialise than has been anticipated, the situation may weaken considerably from what is projected.

CEO Pauli Heikkilä:

“The number of enterprises will inevitably decline if there is no one to continue ageing entrepreneurs’ work. Both competitive companies on the domestic market and companies engaged in exports should be able to continue their operations by means of ownership changes. Acquiring an operating company is a viable alternative to establishing a new one. For our part, we are actively involved in the financing of various ownership arrangements. Together with the Ministry of Employment and the Economy, we are planning a new programme for financing ownership changes. We are also preparing the adoption of an instrument for mezzanine financing. The aim is to put the new financing tools to use in early 2016.

During the period under review, we completed our biggest acquisition of funds to date: one billion euros. We manage a large liquidity reserve in order to be able to finance, among other things, the coming purchases of ships. Our authorisation to grant export credits is already largely in use and we are currently negotiating about raising it.”

Aside from the parent company, Finnvera plc, the Finnvera Group comprises the following subsidiaries: Seed Fund Vera Ltd and Veraventure Ltd, engaged in venture capital investments, and Finnish Export Credit Ltd, which provides export credits and administers interest equalisation.

The Group's financial trend

The Finnvera Group's July-September 2015

The Finnvera Group's profit for the third quarter of 2015 was EUR 51 million, or EUR 23 million better than for the second quarter (28 million). The main factors improving the result were the reduction of EUR 19 million in impairment losses on receivables and guarantee losses, the reduction of EUR 5 million in losses from items carried at fair value, and the decrease of EUR 1 million in administrative expenses.

During July-September, the net value of the Group's fee and commission income and expenses came to EUR 34 million, or 5 per cent and EUR 2 million less than in the previous quarter. This diminished the result for the third quarter when compared against the previous quarter. The Finnvera Group's net interest income came to EUR 15 million in the third quarter. The net interest income remained at the same level as in the second quarter.

The Finnvera Group's January-September 2015

The Finnvera Group's profit for January-September totalled EUR 106 million (76 million). The profit was EUR 30 million more than during the corresponding period in 2014. The main factors improving the financial performance for the past nine months were the decrease of EUR 27 million in impairment losses on receivables and guarantee losses, the increase of 5 per cent, or EUR 5 million, in the parent company Finnvera plc's fee and commission income, as well as the decrease of EUR 6 million in losses from items carried at fair value.

The parent company Finnvera plc's profit for January-September stood at EUR 108 million (84 million). The Group companies and associated companies had an effect of EUR -2 million on the profit (-9 million). Venture capital investments accounted for EUR -8 million (-9 million) of this effect. Interest equalisation and the financing of export credits by Finnish Export Credit Ltd accounted for EUR 6 million (0.5 million).

When the result is broken down by business sector, both the parent company's export financing and SME financing showed a profit for January-September: the separate result for export credit guarantees and special guarantees came to EUR 68 million (79 million), while the profit for credits and guarantees in SME financing was EUR 40 million (4 million).

Analysis of the financial performance for January-September 2015

Interest income and expenses and interest subsidies

The Finnvera Group's net interest income for January-September came to EUR 43 million. The net interest income was two per cent greater than during the corresponding period in 2014 (42 million).

The interest subsidies paid by the State and the European Regional Development Fund (ERDF), and passed on to clients directly, totalled EUR 3 million, or nearly 50 per cent less than the year before. The granting of interest-subsidised financing ceased at the beginning of 2014. In consequence, the amount of interest subsidies during the period under review was smaller than before. The accumulation of interest subsidies will cease completely in the coming years when all interest-subsidised financing has been repaid.

Fee and commission income and expenses

The net value of the Group's fee and commission income and expenses came to EUR 107 million (103 million). Underlying the increase of 5 per cent in fee and commission income were some individual major export credit guarantees that came into effect and the general rise in risk premiums on the market.

The gross sum of the fee and commission income totalled EUR 118 million (109 million). Of this, the parent company's fee and commission income from export credit guarantees and special guarantees accounted for EUR 87 million, or 74 per cent (80), while SME financing accounted for EUR 30 million, or 26 per cent (28). Finnish Export Credit Ltd's fee and commission income from interest equalisation and export credit financing amounted to EUR 0.5 million (1 million).

The fee and commission expenses totalled EUR 11 million (5 million). The fee and commission expenses consisted mainly of reinsurance costs for policies taken out by the parent company, Finnvera plc. Reinsurance protection has been increased, which has contributed to the rise in reinsurance costs.

Gains/losses from items carried at fair value

The Group's losses from items carried at fair value totalled EUR 8 million (14 million). Of these losses, the change in the fair value of venture capital investments accounted for EUR

7 million (11 million). The change in the fair value of debts and interest rate and currency swaps, as well as exchange rate differences, accounted for EUR 0.5 million (3 million).

Other income

In January-September, the Group's net income from investments totalled EUR -0.5 million (1 million). This was caused by losses in the assignment of debt securities. Other operating income totalled EUR 0.6 million (1 million), which comprised, among other things, rental income and the management fee paid by the State Guarantee Fund for managing the liability for export credit guarantees and special guarantees arisen prior to 1999.

Impairment losses on receivables, guarantee losses

The Group's impairment losses and guarantee losses on loans, domestic guarantees, export guarantees and special

guarantees totalled EUR 67 million (70 million). The credit and guarantee losses materialised totalled EUR 102 million (87 million), while the change in impairment losses on credits and in provisions for losses accounted for EUR -35 million (-17 million). The reason for the exceptional negative change in impairment losses on credits and in provisions for losses was that the impairment losses and provisions for losses recognised in previous years were either reversed or decreased.

The compensation paid by the State and the European Regional Development Fund for credit and guarantee losses in SME financing totalled EUR 69 million (45 million), or 66 per cent of the losses materialised. Some large individual losses that materialised in January-September had an impact on the total compensation for credit losses. After the compensation for credit losses by the State, the Finnvera Group's liability for the impairment and losses in the period under review was EUR -2 million (25 million).

Finnvera Group Impairment losses on receivables, guarantee losses	Q3/2015 MEUR	Q2/2015 MEUR	Change %	Q3/2014 MEUR	Change %	1-9/2015 MEUR	1-9/2014 MEUR	Change %
Impairment losses on receivables, guarantee losses	5	-3	-271	10	-55	2	-25	-58
Loans and domestic guarantees	-59	-7	760	-38	57	-66	-79	76
Credit loss compensation from the State	65	5	1 299	23	187	69	45	162
Export credit guarantees and special guarantees	-1	0	117	25	-103	-1	9	-86

Calculated according to the method harmonised at EU level, the net amount of doubtful receivables in SME financing stood at EUR 200 million at the end of September. When the impairment losses recognised are considered, doubtful receivables accounted for 8.1 per cent of the total outstanding commitments. When the State's compensation for credit losses – a reducing factor in SME financing – is also taken into account, the ratio of doubtful receivables to total outstanding commitments was 3.8 per cent.

Operating expenses

The Group's administrative expenses, including personnel expenses and other expenses, were EUR 32 million (29 million). Administrative expenses totalled EUR 2 million more than during the corresponding period in 2014. Personnel expenses accounted for 69 per cent of administrative expenses (68).

Other operating expenses in the Group came to EUR 5 million (5 million). Other operating expenses include depreciation and costs associated with real property.

Long-term economic self-sustainability

According to the goal of economic self-sustainability set for Finnvera's operations, the income received from the company's operations must, in the long run, cover the company's operating expenses. The period for reviewing self-sustainability is 10 years for SME financing and 20 years for export financing.

Self-sustainability in Finnvera's SME financing has been attained over a period of 10 years when the cumulative result is calculated up to the end of September 2015. Correspondingly, export financing has been economically

self-sustainable during Finnvera's history of more than 15 years of operation. If the payment-based result of Finnvera's predecessor, the Finnish Guarantee Board, for its last years of operation is taken into account when reviewing the self-sustainability of export financing, economic self-sustainability is also realised over a 20-year period.

The extent and risk level of Finnvera's outstanding commitments will have a significant impact on its financial performance and long-term economic self-sustainability in the coming years. In examining the financial performance, it is important to note that, at the end of September 2015, Finnvera's total commitments for export credit guarantees and special guarantees amounted to EUR 16.6 billion and the commitments for credits and guarantees in SME financing, as well as guarantee receivables, stood at EUR 2.3 billion. Seen against these commitments, the net profit building a loss buffer on the balance sheet is now about 0.6 per cent at the annual level, and the equity is 6 per cent.

Balance sheet 30 September 2015

At the end of September, the consolidated balance sheet total was EUR 8,055 million (6,619 million), while the balance sheet total of the parent company, Finnvera plc, came to EUR 5,720 million (4,122 million). The consolidated balance sheet total has increased by 22 per cent, or EUR 1,436 million, during 2015. Most of the increase stemmed from the financing of export credits carried out by the subsidiary Finnish Export Credit Ltd. At the end of September, the balance sheet total of Finnish Export Credit Ltd was EUR 4,390 million (3,425 million).

At the end of September, the Group's outstanding credits came to EUR 5,436 million (4,593 million), or EUR 843 million more than at the start of the year. The outstanding credits of the parent company, Finnvera plc, came to EUR 3,143 million (2,193 million), of which the receivables from the subsidiaries totalled EUR 1,977 million (928 million).

The parent company's outstanding domestic guarantees have increased slightly during 2015 and totalled EUR 1,015 million on 30 September (988 million).

The outstanding commitments, as defined in the Act on the State's Export Credit Guarantees, totalled EUR 12,993 million at the end of September (10,755 million). Outstanding commitments arising from export credit guarantees and special guarantees (current commitments and offers given, including export guarantees) totalled EUR 16,628 million (12,600 million).

The parent company's long-term liabilities as per 30 September totalled EUR 4,016 million (2,650 million). Of this sum, EUR 3,928 million (2,564 million) consisted of bonds. The liabilities include subordinated loans of EUR 38 million received by Finnvera from the State for investment in the share capitals of Seed Fund Vera Ltd and Veraventure Ltd (36 million), and a subordinated loan of EUR 50 million granted by the State for strengthening capital adequacy (50 million).

At the end of the period under review, the Group's non-restricted reserves contained a total of EUR 866 million (756 million), of which the reserve for domestic operations accounted for EUR 136 million (135 million), the reserve for export credit guarantees and special guarantees EUR 536 million (436 million), the reserve for venture capital investments EUR 17 million (17 million) and retained profits for EUR 177 million (169 million).

To comply with the requirements of IAS 8 standard, the non-restricted reserves were adjusted during the previous period, Q2/2015. The reason for the adjustment was a system error affecting export credit guarantee income and reinsurance expenses, which meant that the figures for guarantee premiums and reinsurance premiums paid in advance for the previous financial periods and shown on the balance sheet were too high, EUR 53 million. The impact of the adjustment on the net value of the fee and commission income and expenses for the reference period of 1 January–30 September 2014 was EUR -0.7 million (Note 1).

The reserve for venture capital investments, under unrestricted equity on the balance sheet, is used to monitor the assets allocated by the ERDF to venture capital investments.

Acquisition of funds

In January-September, the Group's long-term acquisition of funds totalled EUR 1,447 million (1,299 million). EUR 457 million in long-term loans was repaid (356 million).

Capital adequacy

According to the goal set by the State of Finland, the owner of Finnvera, the Group's capital adequacy ratio should be at

least 12.0 per cent. Capital adequacy is calculated in accordance with the principles of the Basel III standard method. At the end of September, the Group's Tier 2 capital adequacy ratio stood at 17.9 per cent (18.6) while the Tier 2 capital adequacy of the parent company, Finnvera plc, was 17.0 per cent (17.8).

Capital adequacy Finnvera Group	30 Sep 2015 %	31 Dec 2014 %	Change % points	30 Sep 2014 %
Tier 1	17.4	17.7	-0.3	17.2
Tier 2	17.9	18.6	-0.7	18.2

Capital adequacy Finnvera plc	30 Sep 2015 %	31 Dec 2014 %	Change % points	30 Sep 2014 %
Tier 1	16.5	16.9	-0.4	17.0
Tier 2	17.0	17.8	-0.8	18.0

The Act on Finnvera (443/1998) stipulates that domestic operations must be kept separate from export credit guarantee and special guarantee operations. In consequence, losses from domestic operations are covered from the reserve for domestic operations, while losses from export credit guarantees and special guarantees are covered from the reserve for export credit guarantee and special guarantee operations. According to the Act on the State Guarantee Fund (444/1998), the State is responsible for export credit guarantees and special guarantees. Should the reserve for export

credit guarantee and special guarantee operations lack sufficient assets to cover the losses incurred in the respective operations, the losses are covered from assets in the State Guarantee Fund, which are supplemented, whenever necessary, by an appropriation from the State Budget. The above separation prescribed by law, and the State's responsibility for export credit guarantees, explain why Finnvera calculates its capital adequacy, i.e. the ratio between its commitments and assets, only for domestic operations.

The Finnvera Group's risk-weighted receivables totalled EUR 2,369 million at the end of September (2,349 million). Of these, loans and guarantees pertaining to business proper amounted to EUR 1,843 million (1,926 million), or 78 per cent of risk-weighted receivables. Most of the remaining receivables were associated with the acquisition of funds and the

investment of cash assets. About 50 per cent of loans and guarantees consisted of a large number of individual commitments of under one million euros. Calculated according to the standard method, their risk weight was 75 per cent. The risk weight of other loans and guarantees was 100 per cent.

Personnel

At the end of September, the Group had 398 employees (395 on 30 September 2014), of whom 365 (370) held a permanent post and 33 (25) a fixed-term post.

Other events during the period under review

Finnvera's guarantees for ship purchases

Finnvera participates in the financing of two cruise vessels, Mein Schiff 7 and 8, ordered by TUI Cruises GmbH and built at the Turku shipyard of Meyer Turku Ltd. Finnvera provides guarantees for the pre-delivery financing granted to the shipyard and for the post-delivery financing granted to the buyer.

When the ships ordered both earlier and now are considered together, Finnvera's commitments on behalf of the shipowner will rise at most to about EUR 2 billion. After these orders for ships placed by TUI Cruises GmbH, Finnvera's commitments for the financing of Meyer Turku Ltd can rise at most to about EUR 850 million.

Finnvera issued a loan of one billion euros

On 15 September 2015, Finnvera plc issued a seven-year fixed-rate bond of one billion euros. The bond is the largest issued by Finnvera to date under the EMTN (Euro Medium Term Note) Programme.

Finnvera's EMTN Programme and the loans issued under it are guaranteed by the State of Finland. The funds are used both for SME financing and for financing export credits.

Events after the period under review

Changes associated with the new organisation, launched last year in September, continued. As of 1 October, Deputy CEO Topi Vesteri has led the new Credit Decision Unit. The Service Centre is merged with the Service Production Unit, which will begin operations at the start of next year. The aim of these changes is to accelerate the efficient implementation of Finnvera's strategy.

Outlook for financing

In euros, the demand for SME financing was about one third greater than in the corresponding period the year before. The growth was attributable above all to Finnvera's wider mandates, such as the possibility to finance enterprises larger than SMEs and to subscribe bonds. The volume of SME financing is expected to remain at a high level during the last quarter of the year as well.

Demand for export credit guarantees also continued strong during the third quarter and is expected to remain equally brisk until the end of the year. Country risks are always assessed when guarantee decisions are made; at present, a close eye is kept on economic trends in countries such as Russia and Brazil. These two countries together account for just under one quarter of all outstanding export credit guarantees.

According to the current estimate, the Finnvera Group's financial performance for 2015 is likely to be better than in 2014 because there have been fewer new impairment losses and provisions for losses than had been expected. In a similar estimate made early in 2015, the financial performance was expected to fall below that in 2014. The uncertainty factors associated with economic trends make it difficult to predict financial performance. If more risks materialise than has been anticipated, the situation may weaken considerably from what is projected.

Notes to the accounts

Accounting principles

The financial statements of the Finnvera Group and the parent company, Finnvera plc, are drawn up according to the International Financial Reporting Standards (IFRS). The income statement is presented in accordance with the IAS 1 Presentation of Financial Statements.

Finnvera's Interim Financial Statements have been prepared in accordance with IAS 34, *Interim Financial Reporting*, as adopted by the EU. The principles for drawing up the financial statements are described in Finnvera's Financial Statements for 2014.

The new and amended standards introduced by the Finnvera Group and their interpretations are presented in the accounting principles for the 2014 financial statements. They do not have any major impact on the consolidated financial statements.

1 Error in the accrual of fee and commission income and expenses for guarantees, which affects previous periods

Owing to a system error, income from premiums on export guarantees (fee and commission income) and reinsurance expenses (fee and commission expenses) have been recognised overly small on the income statements for previous periods. Correspondingly, the sums for guarantee premiums paid in advance (deferred income) and reinsurance premiums paid in advance (accrued income) have been too large on the balance sheet. The error has been corrected in accordance with the requirements of Standard IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors by adjusting the financial statements as follows:

(1 000 e)	Finnvera Group			Finnvera plc

*) By virtue of Section 4 of the Act on the State-owned Specialised Financing Company, the profit is transferred to the non-restricted reserves, as decided by the General Meeting. The adjustment applies to the profit from export credit guarantees and special guarantees. The decision on the transfer of this adjustment to the reserve for export credit guarantees and special guarantees will be made by the General Meeting at the same time as the decision on the use of the profit for the financial period 2015.

2 Segment information

Segment reporting in the Finnvera Group is based on internal business areas and organisational structure. Client enterprises have been divided into business areas by size, need for financing and development stage. A service concept has been devised for each business area. Finnvera's segments are micro-financing, regional financing, financing for growth and internationalisation, export financing and venture capital investments. The segments and the principles governing the segment accounting are described in more detail in the Finnvera's Financial Statements for 2014.

4 Impairment losses on receivables, guarantee losses

Loans and receivables are considered impaired when there is objective evidence of impairment.

Objective evidence on a customer's capability to fulfil obligations is based on risk classification of the customers, past experience and estimates made by the management about the effect of delayed payments on the accruing of receivables.

Level 1: Investments in shares and reserves are valued at market price based on active trading.

Level 2: The values of interest rate and currency swaps are based on estimates of prices for terminating agreements and for concluding new, corresponding agreements. These estimates are given by banks operating actively on the market. The banks base their pricing on market interest rates and exchange rates. The fair values of liabilities are based on the value calculated on the basis of exchange rates and market interest rates on the reference day (current value of liabilities).

Level 3: The determination of the fair value of the venture capital investments of the subsidiaries engaged in venture capital investment activities is based on the valuation and investments made by outside investors as well as on the portfolio company valuation approved by the fund. The method used is in accordance with the valuation principles and recommendations for early-stage enterprises laid out in IPEV (International Equity and Venture Capital Valuation Guidelines).

Total	21 143 829	16 678 398	17 842 508	13 770 490

Commitments for domestic guarantees mean commitments referred to in §4 and §4a of the Act on Credits and Guarantees Provided by the State-owned Specialised Financing Company (18.6.1998/445) These commitments are current commitments.

Commitments for export credit guarantees and special guarantees mean commitments referred to in the Act on the State Guarantee Fund (18.6.1998/444).

The commitments are presented as total outstanding commitments, which includes both current commitments and offers given:

The parent company's binding financing offers consist of irrevocable financing pledges given for the client in accordance with the Act on Credits and Guarantees Provided by the State-owned Specialised Financing Company. The pledge may be either a pledge to grant a credit or a guarantee, given for a third party, concerning a non-disbursed credit. The figure for the Group also includes the unused credit arrangements for export credits granted by Finnish Export Credit Ltd.

Outstanding commitments arising from export credit guarantees and special guarantees are divided between current commitments and offers given as follows:
