Third quarter 2015 financial results

Eksportfinans' operations remained stable in the first nine months of 2015 whilst financial results were positively affected by extraordinary income.

Net interest income was NOK 299 million for the first nine months of 2015, compared to NOK 341 million for the same period in 2014. The change was a result of the lower level of interest generating assets combined with reduced return on investments partly offset by extraordinary income.

Comprehensive income according to IFRS was negative NOK 251 million for the first nine months of 2015, compared to negative NOK 4,219 million for the same period of 2014. The negative figures were primarily due to the reversal of previously unrealized gains on Eksportfinans' own debt.

Profit excluding unrealized gains and losses on financial instruments amounted to NOK 161 million for the first three quarters of 2015, compared to NOK 113 million for the first three quarters of 2014. The profit was positively affected by extraordinary income as reported in the financial results for the first half-year 2015, in addition to an actuarial gain of NOK 17 million after tax in the third quarter of 2015 related to pension commitments.

Total assets amounted to NOK 68 billion at September 30, 2015, compared to NOK 91 billion at December 31, 2014. The reduction was in line with expectations and due to the limitations on new lending business as well as repayments on the current debt portfolios.

The core capital ratio was 30.3 percent at September 30, 2015, compared to 24.3 percent at December 31, 2014.

At the end of the first nine months of 2015 the company had liquidity reserves totaling NOK 27 billion.
