Opcon: Saxlund takes 4 m EUR order for biomass handling system in the UK

Saxlund International GmbH, a fully-owned subsidiary of Opcon AB, the energy and environmental technology Group, has received yet another high profile order from Babcock & Wilcox Vølund A/S, Denmark. The order is for the delivery of a state-of-the-art biomass handling system to the Templeborough Biomass Power Plant in Sheffield, UK.

The scope of Saxlund's order is the design, manufacturing, delivery and commissioning of a dual automatic fuel handling system with reception and transport lines to the boiler, complete with cranes.

The entire fuel feeding system, including wood storage and conveyor systems will be designed for multi-fuel waste wood, designed for efficiency, minimum maintenance and high availability as well as low emission of dust and noise.

Total order value is over 4 million EUR (close to 40 m SEK) with commissioning and take-over in 2017.

"We are very proud to be able to help Babcock & Wilcox Vølund in yet another high-profile project. We provide technology that is instrumental in ensuring high availability, efficiency and flexibility for our customers. With extensive operations in Germany, the UK and Sweden and with some 60 years of experience, we can offer innovative and well-tested solutions within most applications, says Harald Wehner, Managing Director of Saxlund International GmbH.

Within the bioenergy sector, Opcon offers everything from the design of complete combined heat and power (CHP) plants to handling systems and incineration plants under the Saxlund brand. Under the SRE brand, systems are supplied for treatment and improved energy efficiency for bioenergy-powered district heating plants, sawmills, pellets producers and commercial greenhouses. The offer also includes flue gas condensation equipment for industrial activities.
