Harmonized investment fund “Finasta Umbrella Fund” - Finasta New Europe TOP20 Subfund

ISIN code: LTIF00000443

This subfund is managed by INVL Asset Management UAB (hereinafter – the Management Company).

Objectives and Investment Policy

The objective of the subfund is to achieve maximum return on investment in shares in the New Europe (without Russia) region. The assets of the subfund are invested in a concentrated manner in shares of 15 - 25 companies valued as the most attractive by the managers of the regional subfund. Every company is thoroughly evaluated and analysed selecting the most promising and attractive companies. A low number of positions in the subfund allows to ensure maximum supervision of the selected positions and an effective structure of the subfund, but it can have a significant influence on the fluctuations on the NAV of the subfund.

There are no restrictions on industry and other market sectors, so we can invest in any of the sectors to 100 per cent of the assets of the subfund.

The subfund up to 100 per cent invests in shares of developing markets, which are characterized by large price fluctuations. Therefore the changing situation in stock exchanges may result in large fluctuations of the NAV of the subfund.

If the situation in the market cannot offer better investment opportunities, up to 10 per cent of the assets of the subfund may be invested in bonds and non-equity securities of other

forms (governments and companies). The subfund may invest in different term and credit rating bonds.

The subfund's benchmark – CECE Extended Index EUR. The Management Company can, at its sole discretion, choose specific investments. The benchmark is used indirectly, which signifies an aim not to replicate the results of the benchmark, but to surpass them.

The subfund focuses on experienced investors. Recommendation: this subfund can be inappropriate for the investors that plan to withdraw money sooner than in 5 years.

The subfund's income is not distributed to participants, but it is re-invested.

Please note that you can redeem your investment upon demand by presenting a redemption order form to the Management Company directly or through Funds distributor.

This subfund deals on every business day. Your investment units will be denominated in EUR, the subfund's base currency. The minimum initial investment for this subfund is EUR 25.

Risks and Reward Profile

The risk and reward indicator shows a ratio between the subfund's risk and reward. The further the subfund is in this scale, the higher the possibilities of a probable reward, but also the higher the risk to lose money. The first category does not mean that an investment is risk-free.

The risk category is calculated on the basis of the data from the previous year, which cannot reliably show the future risk profile and do not guarantee the future results of the subfund.

The Fund is in the 5th category. This means that the risk category shown is not guaranteed and it is a high possibility it may change over time (the Fund can be ascribed to another category).

The risk-return ratio in the scale is not guaranteed and over time it can rise and fall (the subfund can be ascribed to another category).

Here are the types of the risks, which are relevant to the subfund and underestimated when calculating the indicator:

Counterparty risk. The risk that the counterparty shall fail to perform its obligations and Fund may expose financial loss. Efforts are made to minimize this risk by concluding transactions with reliable and experienced financial institutions.

Market fluctuation risk. It is the risk that has a direct impact on the value variations of the subfund investment portfolio. Seeking to protect, the assets of subfund are invested for longer term into financial instruments with good future perspective.

Market liquidity risk. The risk to incur losses as a result of low market liquidity that does not allow selling the financial instruments at the desired time and for the desired price.

Operational risk. The risk to incur losses as a result of system failures, human errors or external events, including political or legal risks.

Efforts are made to prevent from adverse market changes for a certain period of time and to reduce the influence of adverse risk factors through the use of derivative financial instruments.
