Volvo Group – the fourth quarter and full year 2015

2015 was a year of largely unchanged volumes, with the exception of construction equipment, where demand declined considerably. Our profitability improved with the operating margin excluding restructuring charges going from 3.0% in 2014 to 8.2% in 2015. This was thanks to cost reductions, but was also helped by positive currency development and capital gains from selling shares.

THE FOURTH QUARTER 2015

- In the fourth quarter net sales increased by 3% to SEK 79.6 billion (77.5). Adjusted for currency movements and acquired and divested units sales decreased by 1%.
- Operating income amounted to SEK 5,382 M (-1,429) excluding restructuring charges of SEK 871 M (830). Currency movements had a positive impact of SEK 1,201 M.
- Operating income includes a positive impact from an arbitration case of SEK 809 M. The fourth quarter of 2014 was negatively impacted by provisions of SEK 3,790 M relating to the EU antitrust case and SEK 660 M for credit losses in China. Adjusted for these three items operating income excluding restructuring charges amounted to SEK 4,573 M (3,021) corresponding to an operating margin of 5.7% (3.9).
- Operating cash flow in the Industrial Operations amounted to SEK 14.7 billion (10.6).

AB Volvo
