

Company Announcement

February 25, 2016

Episurf Medical has been granted additional US patent

Episurf Medical has obtained another granted patent in the United States. The patent covers a method of manufacturing for the company's patient-specific joint implants and associated surgical tools. This is the first patent in this family of patents to be granted.

The generation of new intellectual property and the ongoing maintenance of current IP is a key activity which ensures that Episurf's proprietary, existing technologies and future innovations are well protected. The company currently has approximately 80 active patents and patent applications, distributed in 20 patent families.
