Correction of Autoliv Press Release

(Stockholm, October 18, 2007) - - - Please note that there is an error in the press release published earlier today about Autoliv's acquisition of the remaining 41% of the share in Autoliv Changchun Maw Hung Vehicle Safety Systems.

The correct number for Autoliv's sales to external customers in China are expected to this year reach approximately \$260 million, an increase of more than 40% from the 2006 level.

The number given in the previous press release did not refer to consolidated numbers.
