

PRESS RELEASE

Tilgin signs software support contract with leading system integrator for IPTV solutions to European operator

October 17, 2007 - Stockholm, Sweden: Tilgin, a leader in Customer Premises Equipment (CPE) for triple play and IMS solutions, is today announcing a software support contract with a leading system integrator for IPTV set-top box solutions to a European incumbent operator.

The three year contract covers software support and professional services for a major IPTV solution customer and reflects one of Tilgin's highest service levels within software support. It provides one of the world's leading system integrators with access to software support services through Tilgin's Technical Assistance Center including ongoing software upgrades for Tilgin's IPTV Mood 300 series of customer premises equipment.

The European incumbent operator's IPTV customer base is using the Tilgin Mood 300 set-top box solution and its end-to-end IPTV solution is one of the largest and technically most advanced commercial deployments of IPTV in Europe.

"This support contract underlines the value of software in Tilgin solutions. This is another important step towards increasing revenues from our professional services and support business and represents our biggest support contract to date", says Ola Berglund CEO of Tilgin. "Through Tilgin's support solution access to upgrades and expertise is made available and a future-proof and quality-assured IPTV offering is thereby provided to both the system integrator and the operator."
