COMMENTS FROM THE CEO

BEST QUARTER SO FAR

The second quarter is very strong and furthermore the third quarter in succession in which we are showing good profitability and strong growth. Turnover for the quarter amounted to SEK 77.6 M, an increase of more than 48% and we have turned last year's loss to a positive operating profit amounting to SEK 8.8 M (-12.1). June was the strongest month in the quarter and even since, developments have been favourable.

INCREASED PROFITABILITY

Our turnover is somewhat decreased compared with the first quarter, which was expected, but is increasing by 48% compared with last year. A favourable development has been that the operating profit amounts to SEK 8.8 M, which takes us up to a new level of profitability. We have a continued strong cost control and focusing on improved margins has been noticed in the profits for the second quarter.

We see strong organic growth and the increase in turnover is distributed over several of our existing partners. All products show strong growth and above all, the casino income is beginning to come up to really interesting levels. The net turnover for casino has increased from approximately SEK 4 M for the second quarter last year to close on SEK 15 M for the same period this year. At the beginning of the summer we strengthened our sports betting organisation and look forward to an even better product range and a stronger focus on profitability. We can also see that more and more customers want to complement their poker range with our casinos and sports betting. Unfortunately the launch of bingo has been somewhat delayed but we are aiming to have the first bingo site go live in September.

NEW CUSTOMERS

At the beginning of June, Goldbet integrated with the poker network and after the end of the quarter we have entered into an agreement with Bet1128. What these have in common is that they are already established gaming operators, which makes them extremely interesting. Our broad range, our unique turnkey solutions and our openness towards our customers makes us attractive to potential customers who are currently in other networks.

ACTIVE IN CONSOLIDATION

Work on identifying companies within the digital entertainment industry that complement Entraction Holding has intensified. We are examining the possibilities of strengthening our existing businesses in Entraction Solutions and Casablanca Gaming Group, but also ways of widening the portfolio.

The process of taking up outstanding shares in old 24hPoker AB continues, but I would like to underline that it does not affect our operational business or its profit, but applies to liquidated business.

CASABLANCA GAMING GROUP

Casablanca Gaming Group's turnover has also developed favourably and the effects can now be seen of the intensive work of repositioning the gaming sites and improving the range of products on offer that has taken place during the spring. Not only are the sites growing strongly in Eastern Europe but also in Sweden.

I would also like to take the opportunity to thank my colleagues for ensuring that together we have achieved so much in my first year as CEO of Entraction. We have made the Group profitable and increased the turnover significantly. We have refined the business model, attracted several new major partners and commenced improvements to the gaming platform.

It is my hope that even the markets confidence in Entraction and the valuation of our company can be strengthened now when we have shown that the winter's positive outcome was not a coincidence and that the future looks extremely bright.

Peter Åström, CEO Entraction

PURCHASE OF OUTSTANDING SHARES

Entraction Holding AB has accepted the board of arbitration's

decision on the issue of compulsory purchase of shares in Entraction Solutions AB (formerly 24hPoker AB). ACCOUNTING PRINCIPLES AND ADDITIONAL INFORMATION

All figures refer to the Group unless otherwise stated. Comparisons in the interim report have, unless otherwise stated, taken place in the corresponding period of operating year 2007. For casino and sports betting the income is reported net as the difference between contributions made and paid profits as well as paid bonuses, (gamewin).

Royalty is the monthly income from the integrated poker partners in Entraction's network. The royalty is based on the rake, generated by the integrated partners' players.

The Interim Report is prepared in accordance with IAS 34 Interim Financial Reporting and RR 31 Interim Financial Reporting for groups as well as RR32 Accounting for Legal Entities in respect of the parent company.

The changes and interpretations of the accounting recommendations introduced from 1 January 2008 have had no effect on the operation's financial position and its financial results. In general the same accounting principles have been used as in the Annual Report for 2007.

SIGNIFICANT RISKS

The Group's significant risk and instability factors are mainly legal and political in character. The Entraction Group is dependent upon the legal situation of the gaming industry primarily within the EU where the majority of the company's players are active. The Group does not offer any services to customers resident in the USA. As all gaming takes place in EUR, a certain currency risk exists with regard to this currency. The Group's operations are based in Malta and have been exempted from VAT. Following pressure within the EU the Maltese authorities are looking at this regulation but up until now have not come to any clear conclusion as to changes in regulations. Obligation on the company to pay VAT for services implemented by e.g. the parent company in Sweden, would have a negative effect on the company's profits. Should this be the case the company is looking into moving the gaming operations to another jurisdiction.
