

## IT – Nasdaq Nordic Primary Data Center Relocation Project Update – **Genium INET** (28/16)

*This IT Notice includes instructions for **mandatory activities for ALL customers and service providers** with connectivity to Nasdaq Nordic and Nasdaq Baltic.*

### **Testing activities:**

As previously communicated, Nasdaq will relocate its primary data center from the current Lunda data center to VASBY data center. Furthermore a new Genium INET system has been built on the current DR site (Nasdaq PORT). This impacts all members that directly connect to Nasdaq Equity Derivatives, Fixed Income and Commodities. All members have to, as of June 20<sup>th</sup>, connect to new destination IP addresses and TCP ports to be able to trade and clear instruments on these markets.

Between April 11<sup>th</sup> – April 23<sup>rd</sup> members were able to test their connectivity to the new Genium INET systems. As of May 30<sup>th</sup> a new test period will commence for all members connecting to Nasdaq Equity Derivatives, Fixed Income and Commodities markets. The test period is scheduled between May 30<sup>th</sup> – June 4<sup>th</sup> and will include mandatory tests for members using Genium INET Trading Workstation, Clearing Workstation1, 3<sup>rd</sup> party applications using the OMnet API and the FIX protocol, GV Portal and TradeGuard applications. For details regarding the test, please see the Genium INET Pre-Production test document on our webpage:

### **Further support:**

During the last week of May before the mandatory verification starts, we will have Market Readiness resources in our Copenhagen office available for meetings on the 24<sup>th</sup> of May, in our Oslo office on the 25<sup>th</sup> of May and resources in London on the 25<sup>th</sup> and 26<sup>th</sup> of May. We will also be available in Stockholm any time for meetings or telephone conferences.

Please reach out to us if you would like to meet us during these days or have any concerns or questions. We are also available if you just want to go through your own verification plans together with our Market Readiness experts.
