### **NEWS RELEASE**

# AFRICA OIL 2016 FIRST QUARTER FINANCIAL AND OPERATING RESULTS

May 13, 2016 (AOI–TSX, AOI–Nasdaq-Stockholm) ... Africa Oil Corp. ("Africa Oil" or the "Company") is pleased to announce its financial and operating results for the three months ended March 31, 2016.

At March 31, 2016, the Company had cash of \$523.6 million and working capital of \$474.4 million. The Company's liquidity and capital resource position improved dramatically during the first quarter of 2016 with the receipt of \$439.4 million (inclusive of deposit received prior to year-end) upon completion of the previously announced (November 9, 2015) farmout transaction with Maersk Olie og Gas A/S ("Maersk") whereby Maersk acquired 50% of the Company's interests in Blocks 10BB, 13T and 10BA in Kenya and the Rift Basin and South Omo Blocks in Ethiopia. Proceeds received from Maersk include \$350.0 million as reimbursement of past costs incurred by the Company prior to the agreed March 31, 2015 effective date and \$89.4 million representing Maersk's share of costs incurred between the effective date and closing, including a carry reimbursement of \$15.0 million related to exploration expenditures. An additional \$75.0 million development carry may be available to the Company upon confirmation of existing resources. Upon Final Investment Decision ("FID"), Maersk will be obligated to carry Africa Oil for an additional amount of up to \$405.0 million depending on meeting certain thresholds of resource growth and timing of first oil.

The Company completed the following significant operational activities during and subsequent to the first quarter of 2016:

- On May 10, 2016, the Company announced details of an updated independent assessment of the Company's contingent resources in the South Lokichar Basin in Blocks 10BB and 13T (Kenya). The estimated gross 2C unrisked resources in the South Lokichar Basin, Kenya have increased by 150 million barrels (or 24%) since they were previously assessed during 2014 to 766 million barrels of oil (Development Pending: 754 million barrels and Development Unclarified: 12 million barrels).
- The Cheptuket-1 well (Block 12A) completed drilling to a depth of 3,083 meters. The well encountered oil shows, seen in cuttings and rotary sidewall cores, across a large interval of over 700 meters. Cheptuket-1 is the first well to test the Kerio Valley Basin proving the existence of a working petroleum system in a basin several hundred kilometers distant from the South Lokichar Basin. Additional technical work is required to analyze the results and consider a program to follow up on this result. The PR Marriott Rig-46 rig was released following completion of the well.
- Late in 2015, the results of the Etom-2 well in the South Lokichar Basin (Block 13T) were announced. The Etom-2 well was drilled based on recently acquired and interpreted 3D seismic in a previously undrilled fault block adjacent to the Etom oil discovery. The well encountered 102 meters of net oil pay in two columns. Oil samples, sidewall cores and wire line logging all indicate the presence of high API oil in the best quality reservoir encountered in the South Lokichar Basin to date. Discovering this thick interval of high quality oil reservoirs at Etom-2 further underpins the development options and resource base in the South Lokichar Basin. The result follows careful evaluation of 3D seismic data which was shot after the Etom-1 well completed drilling and demonstrates how the partnership has improved its understanding of the basin. This result also suggests significant potential in this underexplored part of the block as it is the most northerly well drilled in the South Lokichar Basin and is located close to the axis of the basin away from the basin-bounding fault. Accordingly, the resource potential of the greater Etom area and neighboring prospects is being considered as part of a future exploration drilling program.

- Subsequent to the first quarter of 2016, the Governments of Uganda and Kenya announced that separate export pipelines would be developed for the export of production from the development of oil resources in their respective countries. The Company intends to continue working closely with the Kenyan Government and our upstream partners to move the upstream and midstream development projects forward. Pre-Front End Engineering and Design ("FEED") work on both these elements is well advanced and it is expected that FEED will commence in the near term. It is expected that any Kenya standalone pipeline plan will take into consideration the potential to accommodate the transportation of additional oil resource from bordering East Africa countries.
- Over 1,100 meters of whole core has been acquired from the wells drilled in the South Lokichar Basin, and an extensive program of detailed core analysis is ongoing that will provide results throughout the year. A key focus of the core program is to better assess oil saturation and to refine the recovery factors of the main reservoir sands. Early core analysis results support the reservoir assumptions used in the contingent resource estimate and support the view of oil saturations in the reservoir.

Operating expenses increased \$2.5 million during the first quarter of 2016 compared to the same period in 2015. The \$1.1 million increase in professional fees relates to the completion of the farmout transaction with Maersk. The Company made a \$0.6 million donation to the Lundin Foundation in the first quarter of 2016. A gain of \$4.2 million was recognized during the first quarter of 2015 due to the Company's investment in Africa Energy changing from a position of control to a position of significant influence. Stock-based compensation decreased \$3.3 million during the first quarter of 2016 due to the issuance of 5,194,000 stock options of AOC to directors, officers and employees in the first quarter of 2015. One-third of the fair value of the stock options is expensed immediately upon grant, the remaining expense is expected to decrease over the remaining vesting period. There were no options granted during the first quarter of 2016.

### Financial income and expense is made up of the following items:

The Company incurred \$11.9 million of intangible exploration expenditures in Kenya for the three months ended March 31, 2016. Drilling and completion expenditures primarily relate to the Cheptuket-1 exploration well in Block 12A and costs associated with demobilizing the PR Marriott 46 Rig and associated services. Development study expenditures are associated with studies aimed at progressing towards project sanction for the South Lokichar Basin. Exploration studiy costs continue to be incurred in Kenya as the joint venture

considers additional drilling and appraisal targets in advance of potentially re-starting drilling activities later in 2016.

The Company incurred \$0.3 million of intangible exploration expenditures in Ethiopia for the three months ended March 31, 2016, which consists of license fees and capitalized general and administrative costs.

The Company's unaudited consolidated financial statements, notes to the financial statements, management's discussion and analysis for the three months ended March 31, 2016 and 2015, and the 2015 Annual Information Form have been filed on SEDAR (www.sedar.com) and are available on the Company's website (www.africaoilcorp.com).

#### Outlook

In light of the current and forecast short to mid-term oil price environment, the Company has worked closely with its joint venture partners to focus efforts on advancing the South Lokichar Basin development in Blocks 10BB and 13T (Kenya) by undertaking activities aimed at increasing resource certainty and progressing development studies and planning. We are pleased that Maersk have acquired a 25% interest in the project given the vast financial and technical capabilities they bring to the joint venture and related development activities.

A draft South Lokichar Field Development Plan was submitted to the Government of Kenya in December 2015 and will assist discussions as we progress towards a potential final investment decision. Preparation for FEED is under way. Scoping studies and terms of reference for the detailed upstream environmental and social impact assessments have been submitted to the regulatory authorities in Kenya.

In April 2016, the Governments of Uganda and Kenya announced that separate export pipelines would be developed for the export of production from the development of oil resources in their respective countries. AOC intends to continue working closely with the Kenyan Government and our upstream partners to move the upstream and midstream development projects forward. Pre-FEED work on both these elements is well advanced and it is expected that FEED will commence in the near term. It is expected that any Kenya standalone pipeline plan will take into consideration the potential to accommodate the transportation of additional oil resource from bordering East Africa countries.

The vast resource potential of the South Lokichar Basin has been highlighted by our recent independent assessment of contingent resources in the South Lokichar Basin. AOC is working closely with our joint venture partners to establish exploration and appraisal drilling targets in advance of re-starting drilling activities later this year.

### FORWARD LOOKING INFORMATION

Certain statements made and information contained herein constitute "forward-looking information" (within the meaning of applicable Canadian securities legislation). Such statements and information (together, "forward looking statements") relate to future events or the Company's future performance, business prospects or opportunities. Forward-looking statements include, but are not limited to, statements with respect to estimates of reserves and or resources, future production levels, future capital expenditures and their allocation to exploration and development activities, future drilling and other exploration and development activities, ultimate recovery of reserves or resources and dates by which certain areas will be explored, developed or reach expected operating capacity, that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management.

All statements other than statements of historical fact may be forward-looking statements. Statements concerning proven and probable reserves and resource estimates may also be deemed to constitute forward-looking statements and reflect conclusions that are based on certain assumptions that the reserves and resources can be economically exploited. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "seek", "anticipate", "plan", "continue", "estimate", "expect, "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar expressions) are not statements of historical fact and may be "forward-looking statements". Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. The Company believes that the expectations reflected in those forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct and such forward-looking statements should not be unduly relied upon. The Company does not intend, and does not assume any obligation, to update these forward-looking statements, except as required by

applicable laws. These forward-looking statements involve risks and uncertainties relating to, among other things, changes in oil prices, results of exploration and development activities, uninsured risks, regulatory changes, defects in title, availability of materials and equipment, timeliness of government or other regulatory approvals, actual performance of facilities, availability of financing on reasonable terms, availability of third party service providers, equipment and processes relative to specifications and expectations and unanticipated environmental impacts on operations. Actual results may differ materially from those expressed or implied by such forward-looking statements.

### 1) Incorporation and nature of business:

Africa Oil Corp. (collectively with its subsidiaries, "AOC" or the "Company") was incorporated on March 29, 1993 under the laws of British Columbia and is an international oil and gas exploration company based in Canada with oil and gas interests in Kenya and Ethiopia. The Company's registered address is Suite 2600, 1066 West Hastings Street Vancouver, BC, V6E 3X1.

AOC is an exploration stage enterprise that participates in oil and gas projects located in emerging markets, in sub-Saharan Africa. To date, AOC has not found proved reserves and is considered to be in the exploration stage. Oil and gas exploration, development and production activities, in these emerging markets, are subject to significant uncertainties which may adversely affect the Company's operations. Uncertainties include, but are not limited to, the risk of war, terrorism, civil unrest, expropriation, nationalization or other title disputes, renegotiation or nullification of existing or future concessions and contracts, the imposition of international sanctions, a change in crude oil or natural gas pricing policies, a change in taxation policies, and the imposition of currency controls, in addition to the risks associated with exploration activities. These uncertainties, all of which are beyond the Company's control, could have a material adverse effect on AOC's business, prospects and results of operations. In addition, if legal disputes arise related to oil and gas concessions acquired by the Company, AOC could be subject to the jurisdiction of courts other than those of Canada. The Company's recourse may be very limited in the event of a breach by a government or government authority of an agreement governing a concession in which AOC has or may acquire an interest. The Company may require licenses or permits from various governmental authorities to carry out future exploration, development and production activities. There can be no assurance that AOC will be able to obtain all necessary licenses and permits when required.

### 2) Basis of preparation:

#### a) Statement of compliance:

The Company prepares these condensed consolidated interim financial statements in accordance with Canadian generally accepted accounting principles for interim periods, specifically International Accounting Standard 34 Interim Financial Reporting as issued by the International Accounting Standards Board ("IASB"). They are condensed as they do not include all the information required for full annual financial statements, and they should be read in conjunction with the consolidated financial statements for the year ended December 31, 2015.

The policies applied in these condensed consolidated financial statements are based on International Financial Reporting Standards ("IFRS") issued and outstanding as at May 13, 2016, the date the Board of Directors approved the statements.

#### b) Basis of measurement:

The consolidated financial statements have been prepared on the historical cost basis except as disclosed in the significant accounting policies in Note 3 of the annual financial statements for the year ended December 31, 2015.

Those accounting policies have been applied consistently to all periods presented in these consolidated financial statements.

Notes to Consolidated Financial Statements For the three months ended March 31, 2016 and 2015 (Expressed in thousands of United States dollars unless otherwise indicated) (Unaudited)

### c) Functional and presentation currency:

These consolidated financial statements are presented in United States (US) dollars. The functional currencies of all the Company's individual entities are US dollars which represents the currency of the primary economic environment in which the entities operate.

### d) Use of estimates and judgments:

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Significant estimates and judgment used in the preparation of these consolidated financial statements are described in the Company's consolidated financial statements for the year ended December 31, 2015.

### 3) Significant accounting policies:

The accounting policy set up below has been applied to these consolidated financial statements.

#### a) Performance share units ("PSUs")

PSUs are accounted for as equity based awards. The estimated fair value of the awards is calculated based on non-market performance conditions set by the Company which are initially determined at the time of grant. The Company will assess the progress of reaching the individual performance conditions during each reporting period. PSUs cliff vest three years from the date of grant and the estimated fair value of the grant will be expensed evenly throughout the remaining vesting period.

### b) Restricted share units ("RSUs")

RSUs are accounted for as equity based awards. The estimated fair value of the awards is determined at the time of grant. RSUs granted to Non-Executive Directors cliff vest three years from the date of grant. RSUs granted to all other eligible plan participants vest over three years (1/3 on the first, second and third anniversary of grant). The RSUs will be expensed evenly throughout the remaining vesting period.

There are no new standards or amendments to existing standards effective January 1, 2016.

Notes to Consolidated Financial Statements For the three months ended March 31, 2016 and 2015 (Expressed in thousands of United States dollars unless otherwise indicated) (Unaudited)

As at March 31, 2016, \$507.1 million of exploration expenditures have been capitalized as intangible exploration assets (December 31, 2015 - \$934.3 million). These expenditures relate to the Company's share of exploration and appraisal stage projects which are pending the determination of proven and probable petroleum reserves, and include expenditures related to the following activities: geological and geophysical studies, exploratory and appraisal drilling, well testing, development studies and related general and administrative costs incurred in relation to the Company's Production Sharing Agreements with the respective host governments. At March 31, 2016, no intangible exploration assets have been transferred to oil and gas interests as commercial reserves have not been established and technical feasibility for extraction has not been demonstrated.

During the three months ended March 31, 2016, the Company capitalized \$2.2 million of general and administrative expenses related to intangible exploration assets (three months ended March 31, 2015 – \$1.9 million).

During the fourth quarter of 2015, as a result of exploration results to date and oil industry conditions, the Company wrote off \$70.7 million of capitalized intangible exploration assets relating to Ethiopia. The remaining carrying value of the intangible exploration assets in Ethiopia is \$5.8 million.

On February 4, 2016, the Company completed the Kenyan portion of the farmout with Maersk whereby Maersk acquired 50% of the Company's interests in Blocks 10BB, 13T and 10BA in Kenya. At completion, AOC received \$426.6 million (inclusive of the deposit of \$52.5 million previously received) from Maersk. This amount represents \$343.6 million of reimbursed past costs incurred by AOC prior to the agreed March 31, 2015 effective date of the farmout and \$83.0 million representing Maersk's share of costs incurred between the effective date and December 31, 2015, including a carry reimbursement of \$15.0 million of exploration expenditures. An additional \$75.0 million development carry may be available to AOC upon confirmation of existing resources. Upon Final Investment Decision ("FID"), Maersk may be obligated to carry AOC for an additional amount of up to \$405.0 million dependent upon meeting certain thresholds of resource growth and timing of first oil.

On February 22, 2016, the Company completed the Ethiopian portion of the farmout with Maersk whereby Maersk acquired 50% of the Company's interests in the South Omo and Rift Basin blocks in Ethiopia. At completion, AOC received \$12.8 million from Maersk. This amount represents \$6.4 million of reimbursed past cost incurred by AOC prior to the agreed March 31, 2015 effective date of the farmout and \$6.4 million representing Maersk's share of costs incurred between the effective date and December 31, 2015.

Although the Company believes that it has title to its oil and natural gas properties, it cannot control or completely protect itself against the risk of title disputes or challenges.

### 8) Equity-based compensation:

#### a) Share purchase options

At the 2016 Annual General Meeting, held on April 19, 2016, the Company's shareholders approved the terms of the new stock option plan (the "Plan"). The Plan provides that an aggregate number of common shares which may be reserved for issuance as incentive stock options shall not exceed 5% of the common shares outstanding, and option exercise prices will reflect current trading values of the Company's shares. The term of any option granted under the Plan will be fixed by the Board of Directors and may not exceed five years from the date of grant. Vesting periods are determined by the Board of Directors and no optionee shall be entitled to a grant of more than 5% of the Company's outstanding issued shares.

Notes to Consolidated Financial Statements For the three months ended March 31, 2016 and 2015 (Expressed in thousands of United States dollars unless otherwise indicated) (Unaudited)

All options granted vest over a two-year period, of which one-third vest immediately, and expire three or five years after the grant date. During the three months ended March 31, 2016, the Company recognized \$0.6 million in equity-based compensation (three months ended March 31, 2015 - \$4.0 million) related to stock options.

### b) Performance share units ("PSUs")

On April 26, 2016, the shareholders of the Company approved a new Long Term Incentive Plan ("LTIP"). Under the terms of the LTIP, eligible plan participants may be granted PSUs and Restricted Share Units ("RSUs"). The LTIP provides that an aggregate number of common shares which may be reserved for issuance shall not exceed 4% of the issued and outstanding common shares of the Company. PSUs are notional share instruments which track the value of the common shares and are subject to non-market performance conditions related to key strategic, financial and operational milestones. PSUs cliff vest three years from the date of grant, at which time the Board of Directors will assign a performance multiple ranging from nil to two hundred percent to determine the ultimate vested number of PSUs. PSUs may be settled in shares issued from treasury or cash, at the discretion of the Board of Directors.

During the first quarter of 2016, 1,024,000 PSUs were granted to certain senior officers of the Company. The Company accounts for PSUs as equity based awards whereby the estimated fair value of the grant is expensed evenly throughout the remaining vesting period. During the three months ended March 31, 2016, the Company recognized \$0.03 million in equity-based compensation relating to the PSUs.

#### c) Restricted share units ("RSUs")

RSUs are notional share instruments which track the value of the common shares. RSUs granted to Non-Executive Directors cliff vest three years from the date of grant. RSUs granted to all other eligible plan participants vest over three years (1/3 on the first, second and third anniversary of grant). RSUs may be settled in shares issued from treasury or cash, at the discretion of the Board of Directors.

During the first quarter of 2016, 246,000 RSUs were granted to Non-Executive Directors and 1,024,000 RSUs were granted to other plan participants. The Company accounts for RSUs as equity based awards whereby the estimated fair value of the grant is expensed evenly throughout the remaining vesting period. During the three months ended March 31, 2016, the Company recognized \$0.05 million in equity-based compensation relating to the RSUs.

Expensing of the LTIP commenced on March 16, 2016, the date of grant.

During the three months ended March 31, 2016, the Company recognized a total of \$0.7 million in equity-based compensation relating to the LTIP and Stock Option Plan.

Notes to Consolidated Financial Statements For the three months ended March 31, 2016 and 2015 (Expressed in thousands of United States dollars unless otherwise indicated) (Unaudited)

### 9) Segment information:

The Company determines and presents operating segments based on the information that internally is provided to the Chief Executive Officer ("CEO"), Chief Operating Officer ("COO") and Chief Financial Officer ("CFO"), who are the Company's chief operating decision makers. An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses. An operating segment's operating results, for which discrete financial information is available, are reviewed regularly by the CEO, COO and CFO to make decisions about resources to be allocated to the segment and assess its performance. The Company has a single class of business which is international oil and gas exploration. The geographical areas are defined by the Company as operating segments in accordance with IFRS. The Company operates in a number of geographical areas based on location of operations, being Kenya and Ethiopia.

### 12) Related party transactions:

Transactions with Africa Energy Corp. ("Africa Energy")

On September 20, 2011, a Share Purchase Agreement was executed between the Company and Africa Energy which resulted in the Company owning 51.4% of the outstanding shares of Africa Energy. In June 2012, March 2014, March 2015 and December 2015, Africa Energy completed non-brokered private placements reducing the Company's ownership interest in Africa Energy to 32%. Prior to March 2015, when the Company's investment in Africa Energy changed from a position of control to significant influence, the transactions between the Company and Africa Energy were eliminated upon consolidation.

Under the terms of a General Management and Service Agreement between Africa Energy and the Company for the provision of management and administrative services, the Company invoiced Africa Energy \$0.04 million during the three months ended March 31, 2016 (three months ended March 31, 2015 - \$0.2 million). At March 31, 2016, the outstanding balance receivable from Africa Energy was \$ nil (at December 31, 2015 – \$ nil). The management fee charged to Africa Energy by the Company is expected to cover the cost of administrative expense and salary costs paid by the Company in respect of services provided to Africa Energy.

During the three months ended March 31, 2016, the Company invoiced Africa Energy \$0.01 million for reimbursable expenses paid by the Company on behalf of Africa Energy (three months ended March 31, 2015 - \$0.01 million). At March 31, 2016, the outstanding balance receivable from Africa Energy was \$ nil million (at December 31, 2015 – \$0.09 million).

### 13) Equity investment:

During March 2015, the Company's investment in Africa Energy changed from a position of control to a position of significant influence due to the changes to the composition of Africa Energy's board of directors and the Company's ownership interest being reduced as a result of private placements. As a result of the change, the Company's investment in Africa Energy is recorded as an equity investment. Under equity accounting, the Company is required to recognize its investment in its former subsidiary at fair market value on the date control ceases. The fair value of Africa Energy at the date control ceased was \$5.3 million. On loss of control, the Company derecognized \$1.1 million of net assets in Africa Energy, resulting in the recognition of a gain of \$4.2 million for accounting purposes on the loss of control. During March and December 2015, Africa Energy completed private placements in which the Company invested \$1.0 million and \$1.1 million, respectively.

For the three months ended March 31, 2016, 18,452,500 options were anti-dilutive and were not included in the calculation of dilutive loss per share (three months ended March 31, 2015 – 17,363,500).

### 15) Financial instruments:

Assets and liabilities at March 31, 2016 that are measured at fair value are classified into levels reflecting the method used to make the measurements. Fair values of assets and liabilities included in Level 1 are determined by reference to quoted prices in active markets for identical assets and liabilities. Assets and liabilities in Level 2 include valuations using inputs other than quoted prices for which all significant inputs are observable, either directly or indirectly. Level 3 valuations are based on inputs that are unobservable and significant to the overall fair value measurement.

The Company's cash and cash equivalents, receivables, restricted cash, due from related party and payables are assessed on the fair value hierarchy described above. The Company's cash and cash equivalents, receivables and payables are classified as Level 2. The fair value of the investment in Africa Energy at the time of loss of control was determined by a quoted stock price and is classified as Level 1. The investment in Africa Energy does not require any revaluation after the time of loss of control. Assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the placement within the fair value hierarchy level. There were no transfers between levels in the fair value hierarchy in the period.
