

## **Sercel Delivers Two 508<sup>XT</sup> Land Acquisition Systems to One of the Largest Russian Oil Service Companies**

*Paris, France – May 31, 2016*

CGG announced today that Sercel has delivered two of its new-generation 508<sup>XT</sup> land seismic acquisition systems, representing a total of 12,000 channels, to Bashneftegeofizika, one of the largest oil service companies in the Russian Federation.

The Sercel 508<sup>XT</sup> land acquisition system was selected for its unique game-changing cross-technology (X-Tech<sup>®</sup>) architecture which combines the benefits of cable and wireless systems in a single platform. Since the launch of the 508<sup>XT</sup>, more than 100,000 channels have been delivered worldwide to Sercel clients, including to two megacrews currently operating in the Middle East that are consistently achieving record-setting production levels.

The system will first be deployed by Bashneftegeofizika in June on a 3D survey project with difficult access in hilly and forest-covered terrain. Both 508<sup>XT</sup> systems will then be deployed later in the year for winter season operations.

Pascal Rouiller, Sercel CEO, said: “We are particularly pleased to deliver our 508<sup>XT</sup> acquisition system to such a long-standing Sercel client as Bashneftegeofizika. Their first deployment will take place in challenging terrain, where the 508<sup>XT</sup>'s full monitoring capabilities combined with its fault-tolerant architecture will be of great benefit for operations.”

Rustem Yavdatovich Adiev, General Director, Bashneftegeofizika, said: “Both 508<sup>XT</sup> systems will be used for the multiple seismic projects we are planning in the Russian Federation over the coming years. We are confident that the latest Sercel system, with its lighter weight and lower power consumption, will be of key benefit for our operations where field personnel logistics and equipment deployment are very challenging.”

### **About CGG**

*CGG ([www.cgg.com](http://www.cgg.com)) is a fully integrated Geoscience company providing leading geological, geophysical and reservoir capabilities to its broad base of customers primarily from the global oil and gas industry. Through its three complementary businesses of Equipment, Acquisition and Geology, Geophysics & Reservoir (GGR), CGG brings value across all aspects of natural resource exploration and exploitation.*

*CGG employs more than 7,000 people around the world, all with a Passion for Geoscience and working together to deliver the best solutions to its customers.*

*CGG is listed on the Euronext Paris SA (ISIN: 0000120164) and the New York Stock Exchange (in the form of American Depositary Shares. NYSE: CGG).*
