Precise BioMatch Mobile integrated in smartphones from a leading Japanese vendor

Precise Biometrics' algorithm solution for fingerprint recognition in mobile devices, Precise BioMatch™ Mobile, has through cooperation with Fingerprint Cards been integrated in two smartphones from a leading Japanese vendor.

The integration will generate royalty revenue starting from the second quarter 2016. Royalty revenues are based on the number of sensors Fingerprint Cards delivers to the device manufacturer and cannot be forecasted.

"We are pleased to be integrated in the first mobile devices from this leading Japanese vendor. Precise Biometrics fingerprint software is integrated in products from over 30 vendors and has become the preferred choice to ensure a superior user experience and secure identity verification on mobile devices", says Håkan Persson, CEO of Precise Biometrics.

Precise BioMatch Mobile is the industry leading algorithm solution for convenient and secure fingerprint recognition on smartphones and tablets. The unique and patented hybrid algorithm solution is optimized for small fingerprint sensors and platforms with limited processing power and memory space. Precise BioMatch Mobile offers fast, accurate, and secure verification of user's identity, creating a convenient user experience when unlocking mobile devices or authenticating to services.

This press release contains information that Precise Biometrics is required to disclose pursuant to the Swedish Financial Instruments Trading Act (1991:980). The information was submitted for publication at 13.30 CEST on June 10, 2016.
