Alfa Laval delivers equipment for production of high quality nutritional supplements with Omega-3

Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has received an order for equipment to produce high quality nutritional supplements containing Omega-3. The order value is about SEK 70 million. Delivery will take place during 2008.

“Today’s order is another example of the fantastic scope of the Alfa Laval Group”, says Lars Renström, President and CEO of Alfa Laval. “Recently we received a breakthrough order for our new product for cleaning of ballast water on board ships. Before that, several orders within energy related industry and now this order to the food industry for production of among other things popular lifestyle products”.

The nutritional supplement is produced from a shrimp-like crustacean living in the Antarctic region. The end product, after processing, is meal and oil containing high concentrations of Omega-3 fatty acids. Scientific studies have shown a number of positive health effects like reduced levels of blood fats and lowering of blood pressure as well as decreased risk of heart disease.

The systems ordered, that will be mounted on two ships, include several of Alfa Laval’s products and systems including spare parts.

About Alfa Laval

Alfa Laval is a leading global provider of specialized products and engineering solutions based on its key technologies of heat transfer, separation and fluid handling.

The company’s equipment, systems and services are dedicated to assisting customers in optimizing the performance of their processes. The solutions help them to heat, cool, separate and transport products in industries that produce food and beverages, chemicals and petrochemicals, pharmaceuticals, starch, sugar and ethanol.

Alfa Laval's products are also used in power plants, aboard ships, in the mechanical engineering industry, in the mining industry and for wastewater treatment, as well as for comfort climate and refrigeration applications.

Alfa Laval's worldwide organization works closely with customers in nearly 100 countries to help them stay ahead in the global arena.

Alfa Laval is listed on the Nordic Exchange, Nordic Large Cap, and, in 2006, posted annual sales of about SEK 20 billion (approx. 2,2 billion euros). The company has some 10,000 employees.
