#### **Future expectations**

In 2016, "Grindeks" continues focusing on the new markets, diversifying its operations and thereby reducing risks. It is expected, that in the new markets "Grindeks" will gradually reach increasingly higher sales results.

In 2016, "Grindeks" continues widening its product range. Along with registration procedures of the new products in the historical "Grindeks" markets – Russia, other CIS countries and certain EU countries – a number of registration procedures have been initiated in South Asia, Oceania and Persian Gulf countries where "Grindeks" registers the existing products. In 18 European countries 16 generic drugs are now being registered. Currently, under development in different stages starting from the chemical synthesis of active pharmaceutical ingredient to the clinical trials are 14 generics, for 7 of which the registration procedure will be started in 2016.

The situation in Russia and Ukraine, highlighted among the major business risks in the previous periods, gradually becomes stable, having a positive impact on the company's performance indicators in both countries.

Decrease in value or devaluation of national currencies in the CIS countries are still the most significant business risk factors, that might negatively affect the company's performance indicators.

"Grindeks" continues the optimization of current assets and cost reduction in positions which are not related to the company's strategic development projects, as well as product registration and their promotion.
