

Approval up to and including AUT EINGESCHRÄNKT/RESTRICTED for Advenica's SecuriConnect 120 and SecuriConnect 140

Advenica's SecuriVPN network encryptor family member, SecuriConnect, receives approval from the Austrian MoD NCSA for protecting information at the AUT EINGESCHRÄNKT/RESTRICTED security level.

Designed to fulfill the most demanding security requirements of government and defence organisations, SecuriConnect is still a cost-effective network encryptor providing state-of-the-art protection against interception and manipulation of classified information in IP based communication networks. Long-term information privacy is ensured by Advenica's unique technologies; quantum secure algorithms and Three Domain Separation are used for key and device management, respectively. The Three Domain Separation technology, patented by Advenica, guarantees the separation between the sensitive data traffic and system administration, effectively eliminating data leakage during administration while ensuring information integrity.

Advenica's unique network encryptor, SecuriVPN SecuriConnect received approval from the Austrian MoD, Abwehramt/NCSA to protect information up to and including the security level AUT EINGESCHRÄNKT/RESTRICTED.

"We are proud that the SecuriConnect has been approved by the Austrian authorities to protect classified information at RESTRICTED security level. The approval entrenches Advenica's position as the leading European provider of innovative network encryptor solutions. The endorsement also opens up new opportunities for Advenica's solutions, not only in the Austrian market, but also elsewhere."

Stefan Chevul, Product Manager, Advenica AB

About Advenica

Advenica is a leading European provider of cybersecurity. Advenica develops, manufactures and sells advanced cyber security solutions that prevent intrusions, theft and data leakage at information exchanges and therefore enables interaction between and within nations, organisations and systems with high security requirements. www.advenica.com

Advenica AB is a publicly traded company listed on Nasdaq OMX First North Premier with the name ADVE. Certified Adviser is Erik Penser Bankaktiebolag. www.penser.se

About Abwehramt – Austrian Armed Forces Security Agency

The Armed Forces Security Agency (AFSA) is responsible for security within the Austrian Armed Forces. The AFSA identifies all threats to military security and implements appropriate countermeasures.

To ensure security of classified information as well as information security, information processed by any Austrian Armed Forces ICT-system is protected according to its classification level. Therefore the Security Accreditation Authority, the National Communication Security Authority and the Tempest Authority are implemented in the AFSA.
