

MSAB receives order in Asia of 11 msek

As a result of MSAB's market presence and continued development of its "state of the art" mobile forensic tools, the company receives an order for a total of 11 msek. The order mainly consists of XRY office and the contract runs for three years. The customer is a law enforcement agency in Asia that, due to confidentiality, is not further specified.

"It is of importance for law enforcement agencies to prioritize their resources where they are the most useful. Today there are more mobile subscriptions than inhabitants of the earth. Mobile phones are used everywhere, including criminal activities. There is not any kind of crime in which a cell phone has not been used. Our investment in Asia are now showing further results", says CEO Joel Bollö.

MSAB in brief

MSAB is a world leader in mobile forensics technology with the aim of extracting and analysing data from confiscated mobile devices, mainly mobile phones. The company has its own sales offices and sales representatives in Europe, North America, South America, China, Australia and Russia, and together with a number of distributors covers most of the world. The company's proprietary products have become a de facto standard in the field and are used for securing evidence in over 100 countries. The products are complemented by a wide range of training courses, with the opportunity to become certified in a forensically sound method of extracting data from mobile devices. Customers are primarily authorities involved in performing criminal investigations, and include police, military and customs. MSAB is listed on NASDAQ Stockholm under the ticker symbol: MSAB B.
