Mandator signs a framework contract with OMX

Mandator has signed a framework contract as one of five preferred suppliers to OMX.

The contract covers consultancy services in project management, systems development and testing. The contract will run for 2 years.

"For some years we have been supplying IT services to OMX, and are now delighted and privileged to be one of the selected suppliers," says Nicolas Länninge, Customer Services Manager at Mandator.

"The strategic objective of this procurement has been to ensure access to highly skilled IT consultants. In order to achieve this, we have chosen to link up with fewer suppliers, and to set up more long-term ways of working together. We have made an analysis and have reached the conclusion that the companies we have now chosen are the best ones for supporting us in our future developments," says Åke Södermark, OMX Head of Development.
