# 1. Risk Factors

The Issuer believes that the following factors may affect its ability to fulfil its obligations under the Bills. Most of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring.

In addition, factors which are material for the purpose of assessing the market risks associated with the Bills are also described below.

The Issuer believes that the factors described below represent the principal risks inherent in investing in Bills but the inability of the Issuer to pay interest, principal or other amounts on or in connection with any Bills may occur for other reasons which may not be considered significant risks by the Issuer based on information currently available to it or which it may not currently be able to anticipate.

## **Risks Relating to the Bills**

Set out below is a brief description of certain risks relating to the Bills generally:

### **Issuer's liability to make payments under the Bills**

The Issuer is liable to make payments when due on the Bills. The obligations of the Issuer under the Bills are direct, unsecured, unconditional and unsubordinated obligations, ranking *pari passu* without any preference amongst themselves and equally with its other direct, unsecured, unconditional and unsubordinated obligations (save for any obligations required to be preferred by law).

The Issuer has not entered into any restrictive covenants in connection with the issuance of the Bills regarding its ability to incur additional indebtedness ranking *pari passu* to the obligations under or in connection with the Bills.

### ***No Prior Public Market***

The Bills constitute a new issue of Bills. Prior to listing, there has been no public market for the Bills. Although application has been made to admit the Bills to trading on the regulated Market of the ICEX, there can be no assurance that an active public market for the Bills will develop and, if such a market were to develop, the Manager is under no obligation to maintain such a market. The liquidity and the market prices for the Bills can be expected to vary with changes in market and economic conditions, the financial condition and prospects of the Issuer and other factors that generally influence the market prices of securities. Such fluctuations may significantly affect the liquidity and the market prices of the Bills, which may trade at a discount to the price at which a purchaser purchased the Bills.

### ***An investment in the Bills may not be suitable for all prospective investors***

The Bills are not suitable investments for all investors. In particular, prospective investors should not purchase the Bills unless they have sufficient knowledge and experience to make meaningful evaluation of the credit, liquidity and market risks associated with the Bills.

Prospective investors should possess, either alone or together with an investment advisor, the expertise necessary to evaluate the information contained in this Securities Note in the context of its financial situation and tolerance for risk. Potential investors should carefully consider, among other things, the factors described in this section before purchasing the Bills.

### ***Change of law***

The terms and conditions of the Bills are based on Icelandic law in effect as at the date of this Securities Note. No assurance can be given as to the impact of any possible judicial decision or change to Icelandic law or administrative practice after the date of this Securities Note.
