

## IT – INET Nordic – Nasdaq Nordic and Nasdaq Baltic to introduce a new INET MiFID II Test Environment (INET Test M2) for testing of MiFID II functionality as of April 24, 2017 (26/17)

Nasdaq Nordic and Nasdaq Baltic introduce a new INET test environment, INET Test (M2), to facilitate testing of MiFID II functionality prior to MiFID II comes into force. The new test environment is available from April 24, 2017.

### Connectivity information

A new "Connectivity Guideline INET MiFID II (M2) Test" is available under [Nasdaq Technical Information, INET Nordic, Connectivity & Access](#), together with an updated "Nasdaq Nordic IP nets announced to providers" document.

### How to order ports and multicast services

Ordering of INET ports (FIX and OUCH Order Entry, FIX 5.0 Trade Reporting, GLIMPSE, ITCH & NLS TCP) is available via [Nasdaq Member Portal](#). Alternatively, an INET Nordic Port Request Form available at [Nasdaq Technical Information, INET Nordic, Connectivity & Access](#) can be used.

ITCH and NLS Multicast services shall be ordered via Nasdaq Global Information Services (GIS), [dataproductions@nasdaq.com](mailto:dataproductions@nasdaq.com).

Technical access fees are initially complimentary. From July 1, 2017, prices are according to the INET Test (NTF) technical fees in the [Nasdaq Nordic Technical Services Pricelist](#).

ITCH for Reported Trades and FIX 4.2 Trade Entry ports/drops will not be available in INET Test (M2) since they will be decommissioned prior to MiFID II comes into force.

### MiFID II functionality rollout

Information about MiFID II functionality available for testing in INET Test (M2) will be published at [Nasdaq Technical Information, INET Nordic, Testing](#).

Information regarding testing of MiFID II functionality *via Nordic Workstation* will also be published on the same page. Users can access Nordic Workstation M2 build via <https://test.nordicworkstation.com/weborb/applications/nw/Nordicworkstation.html> or by visiting [Nordic Workstation – Nasdaq](#) under "Login And Support". Same user account as in current test system NTF can be used. Ordering additional account can be done via [MemberPortal](#), or Port Request Form available as an alternative at [Nasdaq Technical Information, INET Nordic, Connectivity & Access](#).

## **Application conformance testing (certification)**

Certification of client trading applications, for OUCH and FIX Order Entry, and FIX 5.0 Trade Reporting protocols, has to be done prior to use of the new fields in INET Production. Updated certification test cases will be available during April under [Nasdaq Technical Information, INET Nordic, Certification](#). Testing is to be commenced in the INET Test (M2) test environment.

Certification time schedule:

- OUCH and FIX Order Entry: May – October, 2017
- FIX 5.0 On-Exchange Trade Reporting: April 24 – October, 2017
- FIX 5.0 OTC/APA Trade Reporting: September – October 20, 2017

## **Protocol specifications**

Latest INET Nordic protocol specifications are available at the Nasdaq Nordic Technical Information website, under [INET Nordic Protocol Specifications](#).

The protocols are subject to further changes throughout the MiFID II implementation project.

## **Time schedule**

- INET MiFID II Test (M2) – April 24, 2017
- GCF TST3 – Preliminary May, 2017 (will be communicated separately)
