According to the Register of Enterprises of the Russian Federation's decision No 2166027097476 of 11.03.2016 the limited company «Салдус» has been reorganised and added to the limited company «Деревообрабатывающий комбинат № 3».

REPORT OF THE MANAGEMENT

Type of operations

Principal activities of the Company are forestry and primary wood processing - lumber production. The company complies with FSC and all other environmental requirements. In order to comply with these requirements the Company takes appropriate monitoring and improvement actions on regular basis, however costs for these actions are relatively low with respect to overall production costs.

Performance of the Company during the financial year

JSC PATA Saldus profit from operating activities in 2016 was 773 784 EUR with a net turnover of 42,599,653 euros, which represents earnings per share issued of 1.87 EUR. The Company's financial statements have been prepared based on the information available to board, existing laws and regulations, that gives a true and fair view of assets, liabilities, financial position and profit or loss that is generated by the Company and consolidated group. It is in interest of the Company to take care of their employees' social protection and well-being, because only then the development of the Company can be sustainable.

Financial risk management

Main financial instruments of the Company are loans, finance and operating leases, cash and cash equivalents. The purpose of these financial instruments is to provide the Company with necessary financial depth. The Group has also other financial instruments, such as trade receivables and payables, that are generated through operational activities. The main financial risks arising from use of financial instruments are interest, credit and liquidity risks. In order to reduce financial risks, the Company performs planning of budget and cash flows, with various scenarios applied. Management performs monitoring and control of commercial activities and actual flow of finances for group companies on regular basis. An additional guarantee for proper risk evaluation are credit institutions, that assess credit risk of the company on regular basis by setting a customised The policy of financial risk management of the Company is described in Note 42 of this financial statement

Subsequent events

In the time period between the last day of the financial year and the date of signing the financial statements there have been no significant events that would significantly effect financial results for the year or the financial position of the Company.

Future prospects

In 2017 the company will continue to develop and expand environmentally friendly forestry business in accordance with the FSC forest management and wood flows certificate requirements.

Wood processing company has initiated a certification process of the Energy Management System (LVS EN ISO 50001: 2012), also until March 2018 it is planned to expand business by installing additional timber drying plants with recuperation, where for hearing renewable energy will be

The company will continue to work on employee satisfaction and loyalty-development, which will allow to rise work efficiency, increase productivity, promote customer satisfaction, thus leading to the Company's overall financial performance improvements.

Statement of Management Responsibility

Management is responsible for preparing financial statements based on the initial accounting records of each year of account, which truly reflects the company's financial position at the end of the year of account, as well as results of operations and cash flows for the period.

The Management confirms that, in preparing this report for the period ending on 31 December 2016, proper accounting methods were used, their application was consistent, reasonable and prudent decisions were taken. The Management confirms that the relevant International. Accounting Standards have been observed and the financial statements have been prepared in accordance with the principle of continuation. The Management is responsible for keeping proper accounting records, the company's resources conservation as well as fraud prevention and prevention of other irregularities.

Andris Krastiņš Chairman of the board

NOTES TO THE FINANCIAL STATEMENTS

(1) Summary of accounting policies

General principles

Financial report has been prepared in accordance with Latvian law "On Accounting" and law of annual financial statements and annual consolidated financial statements (the Law), as well as in accordance with Cabinet of Ministers rules 775 " rules of annual financial statements and consolidated annual financial statements law application."

The financial statements have been prepared according to the historical cost accounting principle. The income statement is prepared in accordance with the function of expense method. The cash flow statement has been prepared under indirect cash flow method. The financial statements provide a true and fair view of the Company's assets, liabilities, financial position and profit or loss.

Accounting policy ensures that the financial statement provides information, that: 1. is sufficient and complete enough to allow user of financial statement to draw sound conclusions about the Company. 2. is reliable in a way that:* revealed financial results and position of the Company is correct - not only legal form of the operations is revealed, but also their economical nature, are neutral in a way that the results are not subjectively biased and are precautious;* Are complete in all essential aspects.

General accounting principles

Financial statement items are valuated according to the following accounting principles:

- a) it is assumed that the Company will continue its activities;
- b) unless specified separately, the same valuation methods are used as in the previous year;
- c) valuation is made with sufficient precaution, meaning that:
- profit is recognized only if earned before the end of financial year;
- all known and foreseeable liabilities and losses occurred before the end of the financial year shall be considered, including when they were revealed during the period between the end of the financial year and the day of preparation of the financial statement;
 - all asset impairment losses and depreciation are considered, regardless of whether the financial year is closed with profit or loss.
- d) unless specified separately, revenues and expenses are recognized according to accruals method, that is, considering the moment of occurrence regardless of the day of payment or day when invoice/receipt was issued. Expenses are reconciled with the revenues of the financial year.
- e) Sections related to Asset and Equity, Provision and Liability items are evaluated and classified separately. Income and expenses are classified and disclosed separately except the gains or losses from sale of non-current assets and from similar transactions (e.g., the result of currency exchange rate fluctuation or the result of sale or purchase of foreign currency), which are offset.
- f) Transactions in the financial statement are represented according to their economic substance and matter rather than according to their legal form

Changes in accounting policies and correction of fundamental errors

Due to adoption of the Law on the Annual financial Reports and Consolidated Annual financial Reports (the Law) in 2016, the Company has changed the accounting standards as mentioned below.

a) Evaluation and classification of investment property, biological assets and non-current assets held for sale

The Company uses its statutory right to deviate from legal requirements about Biological assets held for sale disclosure, recognition and evaluation according to IFRS standards.

b) Recognition of deferred tax assets or liabilities - derogations from the Law

Since 2016 entities are no longer required to evaluate and recognize the deferred tax assets or liabilities. In accordance with transition regulations previously recognized deferred tax assets or liabilities shall be written off at the beginning of the financial year to the retained earnings without correcting prior year balance sheet items.

Taking into consideration the fact, that if the Company does not recognize deferred tax assets or liabilities, its financial reports may not give clear and fair presentation of its financial position and operating results. Therefore, the Company is using a derogation clause of the Law which allows application of International Financial Reporting Standards (IFRS) for the deferred tax accounting. The accounting policy applied is specified in Note (9).

d) Evaluation of intangible assets

Due to enactment of the Law, goodwill and other intangible assets with an indefinite useful life shall be depreciated during their projected useful life, but not exceeding 10 years. The Company recognized previously mentioned assets at acquisition cost less impairment losses. The change of policy shall be applied retrospectively.

Considering that the Company has no goodwill and other intangible assets with an indefinite useful life, these changes of the Law does not affect the Company's financial statements.

e) Accounting of grants received

Due to enactment of the Law, grants received to cover the costs incurred in the financial year shall be recognized as income when grants are received and all conditions for acquiring of the grants are fulfilled. The Company has previously recognized revenues from the grants received when the Company acquired the right to receive such grants and all conditions for acquiring of the grant were fulfilled. The change of policy shall be applied retrospectively.

Considering that during 2015 and 2016 the Company received no grants with not matching periods of granting and actual receipt, these changes of the Law do not affect the financial reports of the Company.

e) Changes in classification of items and disclosure of information in the balance sheet, income statement, cash flow statement and statement of changes in equity

Due to enactment of the Law, the structural form of the balance sheet, income statement and cash flow statement has been changed. A new structural form of the statement of changes in equity has been also introduced. Moreover, to improve a clear and fair presentation, the Company performed reclassification of certain types of assets, liabilities, revenue and costs. Prior year comparatives were classified in the financial statements according to the principles of the financial year and are comparable. Reclassification does not affect the financial results.

k) Disclosure of information in the notes to financial statement

Due to enactment of the Law, the scope of information disclosed in the notes to financial statement has been changed by defining different criteria depending on the size of a company. Based on the financial data for the two recent years, the Company is classified as a large entity. Financial statements reflect all information as defined by the Law, as well as additional information to provide the fair and clear presentation.

Except the above mentioned, accounting policies and valuation methods used by the Company are consistent to be the same as in the previous reporting year.

Foreign currency conversion in euro

This financial statement is prepared in euro (EUR), which is the functional currency of the Company and the official currency of the Republic of Latvia.

All transactions denominated in foreign currencies are converted into euro at the exchange rate set by the European Central Bank on the day of transaction. Monetary assets and liabilities denominated in foreign currencies are translated into euro in accordance with the official exchange rate set by European Central Bank for the last day of the financial year. The profit or loss resulting from the exchange rate fluctuations of the foreign currency are recognized in the income statements in the respective period on net amount.

	31.12.2016.	31.12.2015.
	EUR	EUR
1 USD	0.9488	0.9185
1 RUB	0.0156	0.0124

Income recognition and revenue

Revenue contains the total value of goods and services sold during the year excluding discounts and value added tax.

Income is recognized according to the following principles:

Sales of goods - after significant ownership risk and rewards have been passed to the buyer;

Rendering of services - under the percentage of completion method;

Income from fines and penalties - at the moment when payment is received;

Interest income - on an accrual basis;

Dividends - at the moment of acquiring legal rights to receive them.

Intangible investments and fixed assets

Intangible investments and fixed assets are initially recognized at the purchase cost. Purchase cost includes costs, directly related to the acquisition of intangible and fixed assets. In financial statements intangible and fixed assets are recognized at purchase cost or revalued amount less depreciation.

The difference arising from revaluation is recognized in equity under "Non-current investment revaluation reserve", however value reduction is written-off from value increase that was recognised in reserve during prior years. Surplus is included in income statement.

In case of disposal or liquidation of fixed assets, the reserves are written-off to the Income statement in full amount.

Depreciation is calculated on a straight-line basis applying following rates of depreciation set by the management, which are based on the estimated useful life of fixed assets:

Depreciation % per annum

Intangible assets	2-5
Buildings	10-20
Technological equipment	2-15
Other machinery and equipment, transport vehicles	2-10

The Company capitalizes its fixed assets valued over EUR 142 with useful life exceeding 1 year. 100% Depreciation is applied after commissioning for improvements and other low costs items with the value less than EUR 142.

If sufficient evidence is acquired that the future economic benefit associated with subsequent repair or reconstruction costs will flow to the Company, which exceeds the return set previously, costs are capitalized as additional costs to the fixed asset. By capitalizing the cost of replaced parts, the carrying amount of the part replaced is derecognized and charged to the income statement. All other repair and maintenance costs are charged to the income statement during the financial period in which they have incurred.

Net gains or losses from disposal of fixed assets is calculated as the difference between the carrying amount of fixed asset, write-off of related assets revaluation reserve (if any) and proceeds from sale, and recognized in the income statements during the period when disposal has incurred.

If it is possible to conclude due to any kind of occurrence or circumstances that residual value of fixed or intangible assets could exceed its recoverable value, value of fixed or intangible asset is decreased to its recoverable value. Recoverable value is calculated as the highest of fair value less costs to sell this asset or value in use.

Biological assets

The Company has decided, that forest stands should be considered as biological assets. Biological assets are accounted and evaluated in accordance with 41. SGS ""Lauksaimniecība"" requirements. Forest stands initially are recognised in their cost value, however after primary developments remaining part is recognised in its fair value. Fair value is determined by expressing net present value of biological asset as at 2016 by applying 8% discount rate. Average price for purchased felling site m3 in 2016 was calculated by taking into consideration cost of felling site m3 and costs associated to purchase it. Difference between carrying value and value set after revaluation is recognised as income or expenses depending whether value of asset is increased or decreased after revaluation. Result is disclosed in profit or loss statement under cost of goods sold. Biological assets that can't be developed within a year are disclosed in balance sheet under Fixed asset in separate position, that is called Biological assets. Biological assets that are predicted to be developed within a year are disclosed under Inventories in separate position, that is called Biological assets.

Capitalization of borrowing and other costs

The cost of asset under development is increased by borrowing costs and other direct costs during the period of time that is required to complete and prepare the asset for its intended use. The cost of asset is not increased by borrowing costs during period with no active development of asset.

Research and development costs

Research costs are recognized in the income statement when incurred. Development costs that relate to development of asset intended for sale or own use, are capitalized and recognized as intangible assets and amortized on a straight-line basis starting from the beginning of commercial production of the respective product over the period when the return on this asset is expected.

Investments in subsidiaries, associates and other entities

Participation in capital of subsidiaries, associates and other entities, is recognized at their cost less impairment losses.

Inventories

Inventories are recognized at the lower of purchase or production cost and net realizable value. Purchase costs consists of purchase value and overheads, which have been acquired, by delivering inventories at their current position and value. The costs of materials and other expenses, that are directly related to production of particular item, are included in production cost of inventories. Selling expenses are not included in cost. Balance value of inventories is calculated by applying the FIFO method. If net realizable value of inventories is lower than its costs, then the difference is recognized as provisions for the decrease of value.

Long - term investments held for sale

An entity should classify a noncurrent asset as held for sale if its carrying amont will be recovered principally trough a sale transaction rather than trough cuntnuing of use. For this to be case, the asset must be available for immediate sale in its present condition – subject only to terms that are usual and customary for sales of such assets. The company recognizes revenue for any subsequent increase in fair value less costs of asset sale, but not exceeding the accumulated impairment losses recognized in previous periods. Long-term investments are considered as assets held for sale, if they are prepared for immediate sale, the company's management has decided to sell these asset and have started active implementation of this decision. Fixed assets held for sale are valued at fair value, less costs of sale.

Account receivable

Trade receivables are recognized at invoiced amounts. After the initial recognition account receivables are measured at net amount less provisions for doubtful debts. Provisions for doubtful receivables are recognized when the management of the Company considers that it is probable that the total amount of receivables will not be collected in full.

Borrowings

Borrowings are recognized in the value of funds received, net of transaction costs incurred.

Subsequently, borrowings are stated at amortized costs using the actual interest method. Any difference between the original amount borrowed net of transaction costs and the redemption value is recognized gradually in the income statement during the loan use period or in accordance with accounting policy capitalized at the value of construction in progress.

Provisions, contingent liabilities and assets

Provisions are liabilities related to events from current or previous years and at the preparation of financial statements it is probable that an outflow of resources will be required to settle the obligations and their amounts can be reliably estimated. Provisions are valued at present value of expenditures expected to settle corresponding obligation.

Contingent liabilities are not recognized. These could be classified as liabilities only when a probability of resource outflow becomes sufficiently well-grounded. Similarly, contingent assets are not recognized until probability that the Company will gain economic benefits related to a transaction becomes virtually certain.

Accrued liabilities for unused annual leave

Amount of accumulated unused annual leave is determined by multiplying average salary day rate of employees for last six months of financial year with amount of accrued but unused annual leave days at the end of reporting year.

Grants and government assistance

Grants received for the acquisition of fixed assets or other non-current assets are recorded as deferred income and recognized as an income in income statement on straight-line basis over the useful life of acquired assets. Other grants and financial support to cover the expenses are recognized as an income in the period when the respective funding has been received and all material conditions in respect to the grants received has been fulfilled (when the grants are received).

Lease-to-buy (financial lease) - the Company is the lessee

In cases when leased assets are received with lease-to-buy (financial lease) conditions, under which all risks and rewards of ownership are transferred to the Company, they are recognized as Company's assets. Assets under the finance lease are recognized at the inception of lease at the lower of fair value of the leased assets or present value of minimum lease payments. Lease interest payments are included in income statement when incurred.

Lease without redemption rights (operating lease) - the Company is the lessee

In cases when assets are leased under conditions without redemption rights, lease payments and prepayment for lease are included in income statement when they arise. Lease classification whether it is financial or operating lease, is determined by substance and essence of the lease, rather than just legal form of lease. Lease is classified as a financial lease also if lease term covers majority of leased asset's useful life. This applies even if the ownership rights are not transferred to lessee at the end of the lease term or in case if the asset is so specific, that without a substantial modification it could not be used by other parties.

Corporate income tax

a) Corporate income tax for the financial year

Corporate income tax for the financial year is included in financial statements based on the management's calculations prepared in accordance with the tax legislation of the Republic of Latvia.

b) Deferred tax - IFRS only

Deferred tax is calculated according to the liability method with respect to all temporary differences between values of assets and liabilities in the financial statements and their values for tax calculation purpose (tax basis). However, where the deferred income tax arises from first recognition of assets and obligations resulted from transactions, which are not business combination, and at the moment of transaction do not affect profit or loss neither in the financial statements nor for taxation purposes, the deferred income tax is not recognized. Deferred tax liability is calculated based on tax rates that are expected to be applied when the temporary differences reverse. Temporary differences mainly arise from different fixed asset depreciation rates, impairment of assets as well as from tax losses carried forward. In cases, when total result of the deferred tax calculation is an asset, it is recognized in financial statements only if a future taxable profit will be available against which the temporary differences can be utilized.

Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise cash, the balances of the current bank account and other current liquid financial assets with maturities up to 90 days.

Group companies

Subsidiaries of the group or the parent company of the group, or other subsidiaries of the group, or subsidiaries of the subsidiaries of the group are regarded as the group companies.

Associates

An associated company is an entity within a significant influence of other company, which is provided by holding no less than 20% and no more than 50% of the voting rights.

Related parties

Related parties are considered Group companies, Board and Council members, their close family members and entities, in which the previously mentioned persons or companies have significant influence or control.

(42) Financial risk management

Financial risks related to the financial instruments of the Company are mainly the exchange risk, the interest rate risk, the liquidity risk and the credit risk. The Management of the Company seeks to minimize potential adverse effects of the financial risks on the Company's financial position. The Company does not use derivative financial instruments to hedge certain risk exposures.

Market risk - Interest rate risks

The Company is subject to the interest rate risk, mainly with respect to its variable interest rate borrowings. The management of the Company considers a possibility to apply risk hedging instruments in order to minimize the effect of variable interest rates / to switch over to a fixed interest rates

Credit risk

The Company is subject to the credit risk with respect to the trade receivables, issued short-term loans, cash and cash equivalents. The Company manages its credit risk by constantly reviewing the repayment history of the client debts and stating the credit conditions for each client separately. The Company also is constantly monitoring the balances of trade receivables to decrease the risk of non-recoverability of debts.

Liquidity risk

The Company manages its liquidity risk, maintaining the appropriate amount of cash and cash equivalents (and also by using the bank credit line facilities). See also Note 43 in respect of the use of going concern assumption.

(43) Use of going concern assumption

The Company has finished the financial year, which was closed on 31 December 2016, with profit of EUR 773 784. As of this date, the Company's current assets exceeded current liabilities by EUR 2 610 835, and total assets exceeded total liabilities by EUR 7 902 371.

Financial results of 2016 are in accordance with going concern assumption, as well as a going concern is dependent of financial results in next periods.

(44) Subsequent events

Since the last date of the financial year until the date of signing of financial statements, there haven't been any subsequent events, which would have a significant effect on the financial position of the Company as at 31 December 2016.
