

RECORDATI LICENSES GRASPA® FROM ERYTECH IN EUROPE

Milan, 23 November 2012 – Recordati announces that its subsidiary Orphan Europe and Erytech Pharma, a late development stage French biopharmaceutical company focused on orphan oncology and rare diseases, have entered into an agreement granting Orphan Europe the exclusive rights for the commercialization and distribution of Graspas® for the treatment of Acute Lymphoblastic Leukemia (ALL) and Acute Myeloid Leukemia (AML) in Europe. Graspas®, human erythrocytes encapsulating L-asparaginase, for the treatment of hematological malignancies, is currently in pivotal Phase II/III clinical trial for ALL and will enter a Phase IIb trial in AML in Europe. The product has obtained an orphan drug designation in Europe and the USA for ALL.

Graspas® is a new formulation of L-asparaginase with a safer and broader range of clinical use than existing forms due to the entrapment and protection of the enzyme inside homologous red blood cells. The added value of Graspas® (by encapsulating L-asparaginase in red blood cells) relates to its ability to overcome existing limitations associated with conventional L-asparaginase via longer efficacy, better compliance, reduced doses and a better safety profile. Graspas® is intended to satisfy the unmet medical needs of frail patients, patients suffering relapses and other patient groups for whom the current treatments are not suitable.

Marco Liguori CEO of Orphan Europe is delighted with this new partnership "The Orphan Europe team has considerable experience in the orphan drug field and the special requirements of rare diseases. We are committed and prepared to ensure that these treatments become available for patients in Europe rapidly".

"We are very pleased to announce this agreement with Orphan Europe (Recordati Group)" said Pierre-Olivier Goineau, Chief Executive Officer of Erytech. "We believe we have found a partner that is uniquely positioned to ensure market access and commercial success of our lead product in ALL, and to advance the product in AML. Erytech will manufacture the product. This agreement is a major milestone for Erytech, and a clear recognition of the potential of our technology. It will allow us to focus on our developments in the US in solid tumors and in other rare disease indications".

About Orphan Europe

Orphan Europe was founded in 1990 and acquired by Recordati in 2007. For the past two decades Orphan Europe has developed and marketed orphan drugs for patients with rare diseases. In 2000 orphan drugs were defined by the European Drug Regulation as a treatment for a life-threatening or chronically debilitating condition affecting no more than five in 10,000 persons. The parameters involved in the development of an orphan drug are very different from the development of conventional drugs, for example there is a limited number of patients and a scarcity of expertise. Therefore Orphan Europe's approach is based on combined efforts between the company, patients and the medical community with the overall aim to improve the life of affected persons.

Orphan Europe has also built the Orphan Europe Academy with the aim to further the understanding of rare diseases and provide a forum for sharing knowledge and developing new ideas.

About Erytech

Erytech Pharma SA is a late-stage French biopharmaceutical company developing medicinal products for orphan oncology and rare diseases. The company's proprietary core technology is based on the use of human red blood cells (RBCs) to improve the pharmacokinetic (PK) and pharmacodynamic (PD) properties of therapeutic molecules.

Erytech has established a cGMP approved manufacturing facility that can meet the demand for Graspas® products in Europe.

The company is expanding the use of its technology in oncology to Acute Myeloid Leukemia and solid tumors, and outside oncology in enzyme replacement therapy, immunology and haematology indications.

Recordati, established in 1926, is a European pharmaceutical group, listed on the Italian Stock Exchange (Reuters RECI.MI, Bloomberg REC IM, ISIN IT 0003828271), with a total staff of over 3,200, dedicated to the research, development, manufacturing and marketing of pharmaceuticals. Headquartered in Milan, Italy, Recordati has operations in the main European countries, in Central and Eastern Europe, and in Turkey. A field force of around 1,700 medical representatives promotes a wide range of innovative pharmaceuticals, both proprietary and under license, in a number of therapeutic areas including a specialized business dedicated to treatments for rare diseases. Recordati is a partner of choice for new product licenses from companies which do not have a European presence. Recordati is committed to the research and development of new drug entities within the cardiovascular and urogenital therapeutic areas and of treatments for rare diseases. Consolidated revenue for 2011 was € 762.0 million, operating income was € 163.5 million and net income was € 116.4 million.
