About Spectrum

Spectrum provides innovative Multi-Client seismic surveys and high-quality seismic imaging services to the global oil and gas industry from offices in the Norway, UK, US, China, Egypt, Australia, Indonesia and Singapore. SPU designs, acquires and processes seismic data to deliver high quality solutions through its dedicated and experienced workforce.

Spectrum holds the world's second-largest library of Multi-Client 2D marine seismic data. The company's strategy focuses on both the major, established hydrocarbon-producing regions of the world as well as key frontier areas identified by our experienced team of geoscientists. The Spectrum library of Multi-Client data contains projects from many of the foremost oil producing regions of the world. These include new acquisition, reprocessing and interpretation reports.
