Wilson ASA – Business description

Wilson's main activity is the chartering and operation of small dry bulk vessels between 1 500 and 10 000 dwt. Wilson is a premier player in this market. Per 08.05.2012 the Wilson system operates 111 ships, whereof 85 are owning-wise controlled. The company's first newbuilding program (8 x 8 300 dwt) was completed in January and all these newbuildings are now sailing as an integrated part of the fleet with good results. Under the second newbuilding program which was reduced from 8 to 4 ships (4 500 dwt), the first ship was delivered on the 20th March. The remaining three ships are all stipulated to be delivered in the current year.

Wilson's strategy is to offer Norwegian and European industry competitive, reliable, flexible and long-term transportation services. By controlling large contract volumes and long-term contract portfolios, Wilson may optimize vessel operations and over time secure stable income levels.

Result 1st quarter 2012

Net freight income, corresponding to freight income on TC basis amounted to MNOK 243 in the 1st quarter 2012 which was MNOK 15 better than the corresponding period in 2011. The earnings level in the quarter was NOK 23 729/day compared to NOK 23 257/day in the 1st quarter 2011. Additional sailing days in the current year's quarter lifted the turnover more than the relative changes in the earnings levels should indicate.

The company's operating cost including TC hire and administration cost, but excl. depreciations was MNOK 201 in the quarter which was a decrease of MNOK 6 compared to the 1st quarter 2011. Cost for hired in tonnage was decreased with MNOK 10 from the 1st quarter 2011 to 1st quarter 2012 through both redelivery of tonnage and renewals on a lower level. Other operating expenses increased with a total of MNOK 2. The company has continued its low, but adequate level on ships operating expenses.

The operating result before depreciations (EBITDA) was MNOK 44 in the quarter which was MNOK 21 higher than the corresponding period in 2011. The increase can primarily be attributed to more sailing days in the current year's quarter as well as a moderate improvement in the earning levels.

Total depreciations in the company were MNOK 48 in the 1st quarter 2012 which was on level with 1st quarter 2011. The operating result for the current year's quarter was MNOK -3 compared to MNOK -24 for the 1st quarter 2011, an improvement of MNOK 21.

Net result from financial items showed MNOK -15 in the quarter compared to MNOK -19 in the 1st quarter 2011. This year's quarter was affected positively by changes in rates of exchanges. Net effect from agio/disagio/value changes on financial instruments was MNOK 10 for the 1st quarter 2012.

WILSON ASA

1st quarter report - 2012

The company's result before minority and calculated tax was MNOK -18 in the 1st quarter 2012 which was MNOK 26 better than for the corresponding period in 2011. Calculated tax for the quarter was MNOK -6 which gave a period result of MNOK -12. Correspondingly the period result for the 1st quarter 2011 was MNOK -30.

The market

The market in the 1st quarter was weak although somewhat better than the corresponding period last year. At the same time voyage cost was higher compared to last year which gave relatively lower net earnings. Contract coverage was 54 % in the quarter, an increase of 2 % points compared to the 4th quarter.

The activity level measured as the number of voyage days, showed an increase of about 5 % from 1st quarter 2011 to 1st quarter 2012 where the increase came as a result of delivery of newbuildings. From 4th quarter 2011 to 1st quarter 2012 it was about 1 % change in the activity level.

Financing and capital structure

The company's book equity was MNOK 769 per 31.03.2012 compared to MNOK 832 per 31.03.2011. Book equity was thus 28 % per 31.03.2012 compared to 31 % per 31.03.2011 of a total balance of MNOK 2 733 and MNOK 2 716 respectively. Including long term shareholders loan the ratio was 31 % and 34 % on 31.03.2012 and 31.03.2011 respectively.

Interest bearing debt and leasing obligations amounted to MNOK 1 714 per 31.03.2012 compared to MNOK 1 645 per 31.03.2011. The increase came as a consequence of drawdown on building loans related to the company's two newbuilding programs.

The company's earnings in 2011 and so far in 2012 have not been sufficient to be able to clear full installments to the bank according to the original installment plan. The company has thus a constructive dialogue with the lender on the handling of both the installment payment and -structure. It is expected that a solution will be found shortly with the company's two major banks.

Tonnage

The first newbuilding, totaling four in the 4 500 dwt series was delivered on the 20th March. The ship's technical condition satisfies the company's requirements, but the long construction time has been challenging.

Prospects

The earnings level for the 1st quarter; in particular in the spot market, was low, but somewhat better than for the corresponding period last year. Historically the market in the 2nd quarter has been better than in the 1st, but with a continued outlook for weak economies in Europe it is expected a general weak development in the demand within the company's core market. It is therefore difficult to quantify the effect of a positive season variance, but the company expects an improvement in the results for the 2nd quarter. At the same time it is expected that the result will be characterized by low industrial production and weak demand for industrial transportation services in Europe.

Financial principles for the quarterly report

The quarterly report has been established on the basis of international accounting standards (IAS 34).

Notes to the quarterly report

Note 1 – Accounting principles

The interim report has been established according to the IFRS requirements for interim reporting, IAS 34. The Financial Statement for 2012 has been established according to the IFRS standards, the same accounting principles that have been applied and explained in the Annual Report for 2011.

Norwegian kroner is used as functional- and reporting currency. Numbers are stated as whole 1 000 kr (TNOK).

Note 2 – Segment information

2 000 dwt / System

Net operating income in the 1st quarter 2012 was MNOK 47 compared to MNOK 43 in the 1st quarter 2011. The operating result increased with MNOK 5 from MNOK 0 in the 1st quarter 2011 to MNOK 5 in the 1st quarter 2012. Booked value ships per 31.03.2012 showed MNOK 220 compared to MNOK 298 per 31.03.2011. The change arises primarily as a consequence of company internal transfer of ships from this segment and into the 3 – 4 500 dwt segment.

3 - 4 500 dwt

The operating result in the segment showed MNOK -4 for the quarter compared to MNOK -14 in the 1st quarter 2011. Operating income was reduced with MNOK 2 from MNOK 112 in the 1st quarter 2011 to MNOK 110 in the 1st quarter 2012 whereas operating expenses, incl. TC hire cost, was reduced with MNOK 11 to MNOK 94 for the quarter. The decrease can primarily be ascribed to a reduction in TC cost. Booked value ships per 31.03.2012 showed MNOK 971 compared to MNOK 932 per 31.03.2011. Booked value in 2011 increased due to the activation of ongoing payments on the newbuilding program as well as a company internal transfer of two ships from the 2 000 dwt / system segment.

6 – 10 000 dwt

The segment showed total operating income of MNOK 69 in the quarter which was MNOK 15 higher than in the 1st quarter 2011. The operating result showed MNOK 0 which was an improvement of MNOK 7 compared to the 1st quarter 2011. The increase in income came as a consequence of increased activity through the delivery of newbuildings during 2011. Booked value ships showed MNOK 931 per 31.03.2012 compared to MNOK 856 per 31.03.2011. Booked value in 2011 increased due to the delivery of newbuildings as well as the activation of ongoing payments on the building program.

Other

The company's wholly owned container activity Euro Container Line is included in this segment.

In total the segment showed net operating income of MNOK 19 for the quarter compared to MNOK 21 for the same period last year. The operating result showed MNOK -4 which was on level with 1st quarter 2011. Booked value ships showed MNOK 106 per 31.03.2012 compared to MNOK 117 per 31.03.2011.
