Company Announcement No. 06-2008:

FLSmidth to supply world's largest mineral mills and cone crushers

FLSmidth has signed contracts totaling approximately USD 50 million (approximately DKK 257 million) with Chile based Antofagasta Minerals S. A, to supply crushing and grinding equipment for the production of copper, gold and molybdenum at their Esperanza Project, 150 kilometers north of Antofagasta, Chile.

The equipment will be supplied by FLSmidth Minerals. The equipment consists of a Fuller-Traylor gyratory crusher, three FLSmidth Minerals Raptor XL 1100 cone crushers, one Fuller-Traylor gearless SAG mill and two gearless ball mills. The equipment will process 95,000 tonnes per day of ore, reducing the ore to a product suitable for flotation recovery.

The SAG and ball mills as well as the cone crushers being supplied are the largest to be installed in the world today.

"The orders confirm the confidence mining customers place in FLSmidth Minerals' design technology. The relationship developed with Esperanza's sister company, Minera Los Pelambres, where FLSmidth Minerals has a complete maintenance contract, played an important role in the negotiations. As such, these initial contracts provide further opportunity to supply Esperanza with additional products and services," Group CEO Jørgen Huno Rasmussen comments.

The orders will contribute beneficially to FLSmidth earnings until the equipment is delivered in 2009.

Please address any questions regarding this announcement to Group Chief Executive Officer Jørgen Huno Rasmussen, FLSmidth & Co. A/S at +45 36 18 18 00.
