PRESS RELEASE

American veterinarians see the future in drug candidate Paclical® Vet

This weekend Oasmia Pharmaceutical AB presented clinical results for Paclical® Vet at the annual Veterinary Cancer Society Congress in Florida.

Paclical® Vet is a cancer drug for dogs. Henrik von Euler, principal investigator presented the results in Florida for the gathered American veterinary elite.

Lisa Barber, Section Head at Tufts University, Massachusetts, is impressed:

- Dr. von Euler's research is very exciting. The tumor responses he presented are truly impressive. We're all aware that paclitaxel has significant antitumor effects, but as veterinary oncologists, we've been frustrated by the limitations of hypersensitivity reactions to the solvent previously seen. Paclical® Vet which is a novel micelle formulation of paclitaxel has great potential for making important strides in treating dogs with a variety of cancers, says Barber.

Oasmia see the great success at the congress as an additional step further the American market.

Oasmia Pharmaceutical is a pharmaceutical company that specialises in the treatment of severe diseases. A pharmaceutical company based on the latest concepts in bio-organic chemistry. The main idea is to improve the treatment of serious diseases. Primarily, this development is in oncology and treatment with cytostatics but Oasmia also conducts research in antibiotics, asthma and neurological diseases. Oasmia has in-house production capacity of pharmaceuticals for clinical trials, both company related and others. Oasmia has developed several products based on existing pharmaceuticals in a new environment, which leads to whole new solutions for cancer treatment. These products give Oasmia a solid product portfolio within oncology with several products in clinical or pre-clinical phase. Oasmia is listed on NGM Equity.
