Profit before taxes for P&C insurance decreased to EUR 636 million (707) in 2011. The decrease was mainly explained by financial markets' uncertainty during the year, which led to lower investment returns. Year 2011 was also characterized by demanding weather conditions throughout the year. However, despite the higher than normalized weather-related claims, both risk ratio and combined ratio improved to 68.4 per cent (69.1) and 92.0 per cent (92.8), respectively. EUR 135 million (113) was released from technical reserves relating to prior year gains, out of which EUR 85 in business area Industrial.

Return on equity (RoE) decreased to 12.4 per cent (39.8) mainly due to lower investment result mark-to-market and the change in the accounting treatment of Topdanmark holding in the second quarter of 2011. Insurance margin (technical result in relation to net premiums earned) was 11.1 per cent (11.5). Fair value reserve decreased during the year to EUR 139 million (315) at the end of December 2011.

The Group's core tier 1 capital ratio, excluding transition rules, was 11.2 per cent at the end of the fourth quarter and was strengthened by 0.2 percentage points from the previous quarter. For Nordea this includes additional capital charge for stressed VaR, incremental and comprehensive risk. The total CRD III impact was an increase of EUR 4.0 billion in market risk RWA. This was partly offset by continued improvement in credit quality and RWA optimisation activities. The total impact from improved credit quality affected RWA with a reduction by 2.5 per cent.

RWA were EUR 185.2 billion excluding transition rules, up EUR 2.2 billion or 1.2 per cent compared to the previous quarter and were at the same level as at the end of 2010.

To balance the risks on the Group level Sampo plc's debt is mainly tied to short term interest rates and issued in euro or Swedish krona. The debt positions are managed with interest rate swaps and cross currency interest rate swaps. These derivatives are valued at fair value in the profit and loss account although economically they match the underlying bonds. As a result Sampo plc maintains the flexibility to adjust derivative position if needed but this comes at the cost of increased volatility in the Holding segment's finance costs.

Sampo plc's holding in Nordea Bank was booked in the consolidated balance sheet at EUR 6.3 billion. The market value of the holding was EUR 5.1 billion at 31 December 2011. In addition the assets on Sampo plc's balance sheet included holdings in subsidiaries for EUR 2.4 billion (2.4).

With Nordea Bank AB (publ) as its associated company as of 31 December 2009 Sampo Group became a financial and insurance conglomerate according to the Act on the Supervision of Financial and Insurance Conglomerates (2004/699).

Group solvency has in 2011 been calculated according to Chapter 3 of the Act on the Supervision of Financial and Insurance Conglomerates (2004/699). The Act is based on Directive 2002/87/EC of the European Parliament and of the Council on the supplementary supervision of credit institutions, insurance undertakings and investment.

Group solvency ratio (own funds in relation to minimum requirements for own funds) remained flat in the fourth quarter of 2011 and was 138.6 per cent (167.1) as at 31 December 2011. The decrease in the solvency ratio during 2011 was due to the change in accounting of Topdanmark holding, the reduction of the amount of Tier2 loans in Nordea and the calling of If's hybrid loan in March 2011. The minimum capital requirement rose due to the increase in Nordea's capital requirement. The part of Nordea's capital requirement corresponding to Sampo's holding in Nordea is taken into account in the Group's capital requirement.

In Sampo Group solvency is assessed internally by comparing the capital required to the capital available. Capital requirement assessment is based on an economic capital framework, in which Group companies quantify the amount of capital required for measurable risks over a one year time horizon at 99.5 per cent's confidence level. In addition to economic capital, companies assess their capital need related to non-measurable risks like risks in business environment. Capital available or Adjusted Solvency Capital include regulatory capital and in addition other loss absorbing items like the effect of discounting technical reserves and other reserves excluded from regulatory capital.

The economic capital tied up in Group's operations on 31 December 2011 was EUR 4,374 million (4,281) and adjusted solvency capital was EUR 7,262 million (8,521).

Debt financing

Sampo plc's debt financing at the end of 2011 amounted to EUR 2,329 million and interest bearing assets including bank accounts to EUR 1,121 million. During the year the net debt increased to EUR 1,208 million (1,016). Gross debt to Sampo plc's equity was 35 per cent (26).

As at 31 December 2011 financial liabilities in Sampo plc's balance sheet consisted of issued senior bonds and notes of EUR 1,677 million and EUR 652 million of outstanding CPs issued. During 2011 Sampo plc focused on diversifying the maturity structure of its outstanding debt by three smaller issues maturing in 2013, 2014 and 2016, respectively. The average interest on Sampo plc's debt as of 31 December 2011 was 3.73 per cent.

Outlook

The major risks and uncertainties to the Group in the near term

The major risks Sampo Group is exposed to in its normal business activities are credit risk, market risks and insurance risks. Their contributions to Group's Economic Capital requirement are currently within normal boundaries at levels 38 per cent, 36 per cent and 14 per cent, respectively.

Sovereign debt crisis, crisis of political system, potential banking crisis and slow growth may escalate in ways that can affect Group's activities unfavorably although Sampo Group companies do not have direct exposures in sovereigns under pressure and have small exposure to banking sector outside the Nordic region.

Outlook for 2012

Sampo Group's business areas are expected to report good operating results for 2012. However, the mark-to-market results are, particularly in life insurance, highly dependent on capital market developments.

P&C insurance operations are expected to reach their long-term combined ratio target of below 95 per cent in 2012. Nordea's contribution to the Group's profit is expected to be significant.

Dividend proposal

According to Sampo Group's dividend policy, total annual dividends paid shall be higher than 50 per cent of Group's net profit for the year (excluding extraordinary items). In addition, share buy-backs can be used to complement the cash dividend.

The parent company's distributable capital and reserves totaled EUR 6,623,776,460.88, of which profit for the financial year was EUR 682,234,763.79.

The Board proposes to the Annual General Meeting a dividend of EUR 1.20 per share to company's 560,000,000 shares. The dividends to be paid are EUR 672,000,000.00 in total. Rest of funds are left in the equity capital.

The dividend will be paid to shareholders registered in the Register of Shareholders held by Euroclear Finland Ltd as at the record date of 17 April 2012. The Board proposes that the dividend be paid on 24 April 2012.

No significant changes have taken place in the company's financial position since the end of the financial year. The company's liquidity position is good and in the view of the Board, the proposed distribution does not jeopardize the company's ability to fulfill its obligations.

1) The Group solvency is calculated according to the consolidation method defined in Chapter 3 of the Act on the Supervision of Financial and Insurance Conglomerates (2004/699).

2) The key figures for P&C Insurance are based on activity based costs and cannot, therefore, be calculated directly from the consolidated income statement. The result analysis of P&C insurance is presented in note 13.

In calculating the per share key figures, the treasury shares (1,282,390 shares) held by Sampo during the financial year have been taken into account. The number of shares used at the balance sheet date was 560,000,000 and the average number of shares 560,862,572.

The valuation differences on investment property have been taken into account in calculating the return on assets, return on equity, equity/assets ratio and net asset value per share. The tax component includes the tax corresponding to the result for the period, and the deferred tax liability related to valuation differences on investment property.

The total comprehensive income has been used in the calculation of the return on assets and return on equity.

The key figures for the insurance business have been calculated in accordance with the decree issued by the Ministry of Finance and the specifying regulations and instructions of the Finance Supervisory Authority (former Insurance Supervisory Authority).
