

Prime Ministers Office signs agreement with cBrain

The Danish Prime Ministers Office has decided to implement cBrain F2 as their new electronic case management system.

With this order, 7 Danish Ministries in total have chosen cBrain F2 as their internal electronic case management system.

During a few years, cBrain has thereby succeeded to become supplier of the core electronic case management system for 1/3 of all Danish Ministries. This, and the fact that the Ministry of Transport and the Ministry of Climate & Energy received the Danish Digitalization Award 2011 based on their F2 implementation, offer cBrain a solid reference position.

The agreement with the Prime Ministers Office is therefore important to cBrain because reference position is an key element to cBrains growth plans, both in Denmark and internationally.

About cBrain F2

For knowledge organizations who seek to increase effectiveness, quality of work and employee satisfaction, cBrain F2 is a revolutionary and highly effective software tool for digital transformation.

Supported by strong customer references, cBrain F2 offers organizations a new way to work, based on a proven fast track to digitize all work and knowledge processes while supporting everybody from youngest employee to top executives including Permanent Secretary, Minister or CEO.

cBrain F2 is more than an automation tool. It is also a proven digital enabler for organizational development, as the transition to paperless workflow influences culture as well as how people collaborate and share knowledge.

First cBrain F2 was developed for federal governmental use, but now it is also used by Agencies, Municipalities as well as private organizations. The Ministry of Transport and the Ministry of Climate and Energy received the Danish Digitalization Award 2011 due to the remarkable efficiency gains they have achieved based on their cBrain F2 implementation.

cBrain is a Danish software house, listed on NASDAQ OMX.
