

ATLANTIC HURRICANE TRACKING CHART

PLOTTING A STORM
Hurricane center positions are given by latitude and longitude. For example, "the storm's center is located near 41.5 degrees North and 63.0 degrees West." On the chart, read North to 41.5 degrees and then West to 63.0 degrees as shown below.

STORM TIPS Be Prepared ...

- Put together an emergency plan for your family and go over it with them.
- Have at least a 3-day supply of water and non-perishable foods.

If a Hurricane Threatens ...

- Pay attention to local weather reports on radio, TV or the Internet.
- Evacuate if instructed to leave.

After the Storm ...

- Make sure everyone is safe and accounted for.
- If your home or business has any damage, call the property damage experts at Paul Davis, **Call Paul!**
