Helsingborg, Sweden, September 16, 2014

## ReadSoft answers market demand for automated processing of invoices in Asian languages and Hebrew

Companies with operations in multiple countries can now use ReadSoft INVOICES, the world's number-one choice for automated invoice data capture, to automatically extract, validate, and transfer invoice data in languages like Chinese, Japanese, Korean, Hebrew, and Thai, to name a few.

As more companies expand their reach into emerging markets around the world, the demand for business process automation, with its ability to unite and streamline financial processes across an organization, has increased in tandem. With new language capabilities, the latest release of ReadSoft's INVOICES enables businesses to expand their financial operations into emerging markets without restraint. Enhanced key benefits and capabilities include:

- **Increased control and accuracy of invoices in all languages:** Data from all incoming invoices, including new Asian languages, can be automatically captured, extracted, and routed to an existing enterprise resource planning (ERP) system in a single workflow, eliminating the inaccuracy and cost of maintaining separate workflows.
- **Improved user experience and faster processing times:** More intuitive look and feel enabling operators to get more work done in less time.
- **Enhanced electronic invoicing:** Quicker and more reliable onboarding of suppliers that send invoices in XML, image, and PDF formats.

“As our customers grow and become more globally integrated, we're seeing increased demand for automated invoice processing in more languages,” says Per Åkerberg, President and CEO of ReadSoft. “These companies drive continuous innovation, even in capture technology that has been around for almost a quarter of a century. Our latest release meets this need by delivering advanced capture of invoice data coming from some of the world's fastest growing economies.”

Cost-conscious, efficiency-seeking enterprises of any size in search of a proven, user-friendly application for automating invoice processing are encouraged to contact ReadSoft or one of ReadSoft's valued partners.
