Company Announcement No. 26-2014:

FLSmidth to supply cement production line in Colombia

FLSmidth has received a contract from the Mexican cement producer CEMEX for the supply of a 2,800 tonnes per day cement production line to be installed at their new Cementera del Magdalena Medio S.A.S. cement plant. The plant is located in the department of Antioquia, approximately 135 km from the capital of Antioquia, Medellin.

The line will use the latest production technologies and achieve high environmental and quality standards. The department of Antioquia is a region in Colombia that is expected to see an increase in cement demand resulting from continued economic growth as well as planned investments in infrastructure.

In addition to engineering services, project management, and commissioning, all major processing machines are included. The pyro processing line consists of an FRM™ mill for raw grinding, an ATOX® coal mill, 5-stage ILC preheater with a Low NOx Calcliner, a FLSmidth® Cross-Bar® cooler, and a two-pier kiln. Pfister® weighing and dosing systems, MAAG® gear reducers, gas analyzers as well as all Airtech process filters are also included.

“Colombia has experienced a strong economic growth and is expected to see an increase in the cement demand. FLSmidth has a strong local presence in the country – including a regional office and a local service unit, so we are ready to serve the market,” President of the Cement Division Per Mejnert Kristensen comments.

The order will be booked by the Cement Division and contribute beneficially to FLSmidth's earnings until late 2017.

Please address any questions regarding this announcement to President of the Cement Division Per Mejnert Kristensen, FLSmidth & Co. A/S at +45 36 18 18 00.
