Cybercom builds Landskrona's website

Cybercom has won a contract to develop Landskrona City's new website, landskrona.se. The contract is for two years with a possible extension and further development for up to five years. New modern features will be implemented along with a new technical platform, the Episerver content management system.

"Landskrona City works intensely with its branding, and the website is an important channel for profiling and marketing Landskrona. It should provide easily accessible information about municipal services for all residents, businesses and visitors. Our experts in digital channels and UX will ensure the best possible user friendliness," says Fredrik Sjöholm, Account Manager, Cybercom.

The website will be developed with a responsive design and will be optimised for search engines and comply with the WCAG 2.0 standard and eGovernment Delegation guidelines.

"I am delighted to be entrusted with this business by Landskrona City. It further reinforces Cybercom's position in the public sector in southern Sweden, which is important for us," says Conny Karlsson, Head of Region, Cybercom Öresund.

Landskrona City has approximately 43,000 inhabitants and some 3,000 employees. The city is beautifully situated at the edge of the Öresund strait and has good and efficient communications with neighbouring cities, making it an attractive place in which to live and work. Landskrona.se should reflect this and also be easy for its editors to update.
