

Aqeri to Exhibit at SOFIC 2016

We are pleased to inform you that Aqeri will be exhibiting at SOFIC (Special Operations Forces Industry Conference) 2016, which will take place May 23-26 in Tampa, Florida, US.

We would like to invite you to visit us at stand 2226 in Tampa Conference Center, where our MIL-STD rugged computers, displays and communication equipment, will be presented.

We are also showing our brand new Aqeri 81022 Rugged Micro Computer. It is fanless and designed with the 5th generation of Intel® i7 processor. It comes in a very small form factor, ideal in applications like combat vehicles, helicopters and UAVs.

In the world of high-tech computers and communications equipment, there is a great deal of focus on the latest gadgetry and innovation. These almost daily developments take the back seat to demands of durable quality and lasting performance and supply. To meet this type of sustainability, Aqeri work closely with leading component suppliers to enable prolonged serial deliveries. We also maintain the necessary stocks of replacement components to ensure your long-term investment.
