PRESS RELEASE

LINKÖPING, JUNE 27, 2016

JLA to implement IFS Applications 9

IFS Applications 9 selected as the new finance and service contract management system for JLA's growing business in an agreement valued at £1million

IFS, the global enterprise applications company, announces that JLA, one of the UK's leading suppliers of commercial and industrial laundry and catering equipment, will implement IFS Applications™ 9 for its entire operation.

IFS Applications 9 will provide JLA with an advanced system to manage its customer contracts by encompassing service contracts, rental and asset management, as well as full financials, purchasing, inventory, and production control in one centralized system. Once implemented, JLA will be able to control and improve the quality and efficiency of its service to clients.

James Greenman, JLA Chief Information Officer commented "IFS Applications 9 was selected because it not only meets JLA's current needs, but it is agile enough to adapt to changing requirements, laying the foundations for a long-term strategic relationship. The project will begin immediately and is scheduled to go live in the second quarter of 2017".

"It's great to be working with such a customer-focused and growing company," IFS UK Managing Director Paul Massey said. "Our work with JLA demonstrates our strength in helping service-centric firms effectively manage business and we look forward to a long and successful partnership."
