PRESS RELEASE

Seamless secures breakthrough order in the Americas – Order for distribution platform for prepaid accounts valued at MSEK 5

Nasdaq Stockholm-listed Seamless has received its first order in the Americas. A telecommunications operator has placed an order to purchase the ERS360 transaction platform, which handles the electronic top-up of prepaid accounts for mobile phones. In the first phase, the order value will correspond to MSEK 5.

Via its SDS business area, Seamless is a global leader in systems that handle the refill of prepaid accounts. To date, the company has primarily sold these types of solutions to telecommunications operators in Africa and Asia.

“This order is further confirmation that our solution for top-up of prepaid accounts for mobile phones is one of the foremost in the world. We will now focus on strengthening our presence in the Americas. The potential exists to firmly establish our company on this continent, similar to the position we enjoy in Africa and Asia,” says Peter Fredell, CEO of Seamless.
