Bang & Olufsen Sound System in Audi A4

In connection with the international motor show in Frankfurt from 11-23 September 2007, Audi and Bang & Olufsen are pleased to announce that a Bang & Olufsen Sound System will be available for the new Audi A4. The car and the system will be on sale at Audi dealers by the end of the calendar year 2007. This is expected to make a positive contribution to the Bang & Olufsen Group's development over the coming years, but it will not change the expectations for the current financial year.
