

Press release LightLab Sweden AB (publ) 2016-09-28

LightLab Sweden introduces the first EEE Light® UV disinfection reference product

LightLab's first reference product for UV disinfection includes a tube shaped (T8) light source, an intelligent electronic drive unit and relevant product documentation. The product offers providers of UV disinfection equipment an efficient way to evaluate the technology for their applications.

The product is primarily aimed at applications which benefits from the unique features of the EEE Light® technology:

- Environmentally sustainable – Mercury free
- Immediate start-up – Lower cost of ownership and enabling new applications
- Independent of ambient temperature – Works equally well at -20°C as at +80°C
- High bacterial efficiency – Unique UV spectrum

Further information on this reference product is now available on LightLab's website www.lightlab.com
