

INTERIM REPORT

1 January–30 September 2016 | SBAB Bank AB (publ)

SBAB!

från dröm till hem

THE QUARTER IN BRIEF

For the third quarter, we are once again reporting historically strong figures.

KLAS DANIELSSON CEO of SBAB

Q3 2016 (Q2 2016)

- Lending increased and totalled SEK 305.0 billion (302.7).
- Deposits rose to a total of SEK 93.4 billion (88.0).
- Operating profit increased to SEK 534 million (490), and to SEK 517 million (486) excluding the net result of financial items.
- Net interest income grew to SEK 745 million (692).
- Expenses amounted to SEK 214 million (224).
- The C/I ratio was 28% (31).
- Net loan losses totalled SEK 20 million (recovery: 1).
- Return on equity was 12.3% (11.8), and 12.0% (11.7) excluding the net result of financial items.
- The Common Equity Tier 1 (CET1) capital ratio was 28.5% (28.4).

January–September 2016 (January–September 2015)

- Lending increased and totalled SEK 305.0 billion (284.0).
- Deposits rose to a total of SEK 93.4 billion (71.5).
- Operating profit increased to SEK 1,463 million (1,090), and to SEK 1,423 million (1,116) excluding the net result of financial items and restructuring costs.
- Net interest income grew to SEK 2,067 million (1,795).
- Expenses amounted to SEK 650 million (574).
- The C/I ratio was 30% (34).
- Net loan losses totalled SEK 20 million (29).
- Return on equity was 11.9% (10.1), and 11.6% (10.4) excluding the net result of financial items and restructuring costs.
- The CET1 capital ratio was 28.5% (25.6).

THIS IS SBAB

Our business idea is to be mindful and innovative in our offering of loan and savings products to consumers, tenant-owners' associations and property companies in Sweden. Our mission is to help improve housing quality and household finances.

Total lending, 30 Sept 2016

SEK **305** billion

30 June 2016: SEK 303 billion

Total deposits, 30 Sept 2016

SEK **93** billion

30 June 2016: SEK 88 billion

Two business areas

SBAB Bank AB (publ) has two business areas: Retail and Corporate Clients & Tenant-Owners' Associations. The Retail business area offers savings and loan products, and digital home and housing services to consumers. Its core product is residential mortgages. The Corporate Clients & Tenant-Owners' Associations business area offers savings and housing financing primarily to property companies and tenant-owners' associations.

Owner

SBAB started operations in 1985 and is wholly owned by the Swedish state.

440 employees¹⁾ – five offices

- Stockholm (2)
- Karlstad
- Gothenburg
- Malmö

¹⁾ Number of employees at 31 August 2016, expressed as full-time equivalents (FTEs), adjusted for sick leave and leave of absence, excluding employees of the subsidiary Booli Search Technology AB, (Booli). One of the two Stockholm offices belongs to Booli.

SWEDEN'S MOST SATISFIED RESIDENTIAL MORTGAGE CUSTOMERS

In 2015, for the second successive year, SBAB had Sweden's most satisfied residential mortgage customers according to Svenskt Kvalitetsindex (SKI).

STATEMENT BY THE CEO

Once again, we are reporting strong quarterly figures in terms of high net interest income, strong earnings, low loan losses, a low C/I ratio and a healthy return on equity. Margins on residential mortgages remain high driven by a combination of factors, including raised capital requirements, expectations of forthcoming additional capital requirements, a strong market for covered bonds, high rates of saving with strong deposit inflows, a robust housing market with high demand for residential mortgages and rising property market risks with increasing restraint in credit granting by residential mortgage providers.

Our lending increased SEK 2.3 billion in Q3 and totalled SEK 305.0 billion. However, our total lending and market share for residential mortgages will decrease in the fourth quarter, attributable to partnerships currently being discontinued.

The main contributory factor is the transfer of slightly more than SEK 12 billion in residential mortgages to Swedbank in October following the already discontinued partnerships with Sparbanken Skåne and Sparbanken Öresund. Excluding the partnerships under discontinuation, the volume trend for residential mortgages remains healthy.

Our strong volume growth in deposits continues. Deposits increased SEK 5.4 billion in Q3 and totalled SEK 93.4 billion. We offer a savings rate that is one of the highest offered by Swedish banks. In a market where the major banks are not paying any interest on savings and where consumer savings are at record highs, we are winning many new savings customers.

A modern IT structure

During Q3, we signed an agreement to replace our base system over a three-year period. This project also includes changing much of our existing IT structure. Consequently, our investment and development costs will increase in the coming years, though in the long-term, the project aims to increase efficiency and reduce marginal costs in a number of areas.

We are committed to creating the market's most efficient, digital mortgage process, in parallel with our work developing tomorrow's homes and household financial services. If we are to achieve our vision – to offer the best residential mortgages in Sweden – by developing customer relations and not losing ground to new players in a rapidly changing environment, we need to be quick-footed and innovative in our work and in our processes. A modern and flexible IT infrastructure is a prerequisite for this.

A mortgage licence – it stands to reason

Under the EU Mortgage Credit Directive mortgage directive, an EU directive from 2014, the personnel at organisations that offer credit, credit brokering or advisory services in the field of consumer mortgage credits to consumers are required to possess certain knowledge and skills. As part of the work with the Mortgage Credit Directive and together with Swedish industry body SwedSec Licensing AB, the Swedish Bankers' Association has developed a separate competence test for personnel who work with mortgages, which leads to a license to be able to

KLAS DANIELSSON, CEO OF SBAB

work with mortgages. Improved consumer protection in the mortgage market is welcome, and we believe an industry-wide standard comprising a competence test and a licence for mortgage loans to be extremely positive. The vast majority of SBAB's employees will be licensed for mortgage loans and licencing started in Q3.

The housing market's fundamental problems are still there

On 1 June this year, a new repayment requirement was introduced with the aim of counteracting rising household debt and indirectly tempering the house price trend through lower demand for mortgages. Thus far, the repayment requirement has had limited market impact, even if it is too early to draw any conclusions. The limited impact is partly due to many banks having already implemented various types of repayment requirements, but perhaps mostly due to the continued housing shortage in Sweden. It remains my opinion that we need to adapt the tax system to increase housing-market mobility and to use the existing housing stock more efficiently, and take the requisite political decisions to facilitate, accelerate and increase construction.

Solna, October 2016

Klas Danielsson
CEO of SBAB

²⁾ As of Q1 2016, SBAB has been using a new method of calculation to assess the number of mortgage objects financed. An object refers to a house, tenant-owner's right or holiday home.

³⁾ Source: Statistics Sweden. Market shares are stated per month before the end of the respective period. The Q3 figures correspond to market shares at 31 August, the Q2 figures market shares at 31 May and the figures for Jan-Sep correspond to the market shares at 31 August.

Market comments

Demand for residential mortgages, property financing and savings accounts continued to expand in Q3. A growing population, rising employment, low interest rates, high house prices and increased housing construction acted as market stimulants. The repayment requirement introduced on 1 June dampened demand for mortgages during the summer, but a small upswing was discernable toward the end of the quarter. In time, the stricter repayment rules will restrain loan growth. Interest rates were relatively stable during the quarter despite some reasons for concern in the macro environment. Generally, house prices

continued to climb in Q3, albeit at a slower pace than previously and with some regional differences.

Trend for Q3 2016 compared with Q2 2016

Group

In Q3, total lending increased SEK 2.3 billion (3.4) to SEK 305.0 billion (302.7). In the same period, new lending dropped to SEK 12.9 billion (17.5).

Total deposits rose SEK 5.4 billion (6.8) to SEK 93.4 billion (88.0).

The Retail business area

The Retail business area offers savings and loan products, and digital home and housing services to consumers. The core product – residential mortgages – is supplemented with personal loans, savings accounts and insurance broking. The number of residential mortgage customers amounted to 250,000 (251,000) at the end of the quarter, distributed over 160,000 mortgage objects (161,000).

During the quarter, new retail lending increased to SEK 10.7 billion (14.2), while total lending rose to SEK 220.6 billion (218.8). The reduction in new lending was mainly attributable to the after-effects from the implementation of the repayment requirement and certain seasonal effects.

The market share of retail mortgages was 7.68% at 31 May 2016 (7.77 at 31 May 2016), corresponding to SEK 217.6 billion (216.1). The decline was due to redemptions related to the partnerships being discontinued. At the end of the quarter, the market share for personal loans was 0.93% (0.94), corresponding to SEK 2.0 billion (2.0).

A substantial majority of SBAB's residential mortgage customers still choose shorter maturities, and the share of total lending with a three-month fixed-rate period amounted to 75.0% (74.4) at the end of the quarter.

Since 1 June 2015, Swedish banks report their average mortgage rates for new loans and loans with amended terms and conditions, in line with Finansinspektionen's (Sweden's financial supervisory authority) regulations. In September, the difference between SBAB's average and list rates was 0.11 percentage points (0.10) on a three-month fixed-rate loan which, in market terms, is an extremely low figure that reflects SBAB's aim of offering transparent terms and conditions.

SBAB's savings accounts offer a competitive interest rate compared with the company's competitors, and deposit inflows

remained strong in Q3 2016. Retail deposits rose SEK 2.3 billion (3.5) in the quarter and totalled SEK 64.0 billion (61.6). At 31 August 2016, the market share of retail deposits was 3.99% (3.90 at 31 May 2016). SBAB aims to continue efforts to diversify the company's funding sources through increased retail and corporate deposits.

The Corporate Clients & Tenant-Owners' Associations Business Area

The Corporate Clients & Tenant-Owners' Associations business area offers savings and loan products primarily to property companies and tenant-owners' associations. The number of loan customers declined to 2,675 (2,742) at the end of the period. The decline in customer numbers over the last quarters was primarily attributable to a reduction in the number of tenant-owners' association customers, in line with SBAB's strategy of focused and qualitative credit granting.

During the quarter, new lending to corporate clients and tenant-owners' associations grew to SEK 2.2 billion (3.3), mainly due to holiday effects. In the same period, new lending grew to SEK 84.4 billion (84.0), driven by increased lending to property companies.

The market share for tenant-owners' associations was 11.87% at 31 August 2016 (12.34 at 31 May 2016), corresponding to SEK 48.1 billion (49.1). The decrease over the quarter was a consequence of continued intense competition among Swedish banks regarding lending to tenant-owners' associations. At the end of the quarter, the market share for housing financing to corporate clients was 11.06% (10.99), corresponding to SEK 27.7 billion (27.4).

Deposits from corporate clients and tenant-owners' associations rose SEK 3.1 billion (3.3) in the quarter and totalled SEK 29.4 billion (26.3). At 31 August 2016, the market share of deposits from corporate clients and tenant-owners' associations (excluding financial companies) was 3.06% (2.71 at 31 May 2016).

Trend for Q3 2016 compared with Q2 2016

Net interest and commissions

Net interest income grew to SEK 745 million (692) due to lower funding costs for borrowing in the capital market and for deposits and posted a new high for SBAB for a single quarter.

From Q1 2016, the fee to the government stability fund that was recognised under net commissions was replaced by a resolution fee, which is recognised in net interest income. The resolution fee was SEK 12.5 million (12.5) for the quarter.

Net commission income dropped to SEK 1 million (10). The variance between the quarters was primarily attributable to greater profit sharing from insurance companies in Q2.

Net result of financial items measured at fair value

The net result of financial items measured at fair value was SEK 17 million (4). The difference between the quarters was primarily attributable to the positive effects of hedge accounting, which was partly offset by changes in market value linked

to changed credit spreads for securities in the trading portfolio. For more information; please refer to Note 2.

Expenses

Expenses decreased to SEK 214 million (224), with the difference between the quarters being mainly attributable to a temporary increase in non-recurring IT costs in Q2.

Credit quality and loan losses

In Q2, on 1 June 2016, SBAB introduced new loan repayment rules in line with regulations issued by Finansinspektionen. The rules include a repayment rate of 2% per year for new residential mortgages with a loan-to-value (LTV) ratio of more than 70%, and 1% per year down to an LTV ratio of 50%.

At the end of Q3, the average LTV ratio in SBAB's mortgage portfolio was 64% (64). At the same date, the average residential mortgage to retail customers amounted to SEK 1.4 million (1.4).

SBAB's loan losses remained low and totalled SEK 20 million (recovery: 1) in Q3. The difference between the quarters was

attributable to an increase in collective provisions. For more information on loan losses; please refer to Note 3.

Operating profit

Operating profit grew to SEK 534 million (490), and to SEK 517 million (486) excluding the net result of financial items and restructuring costs. The variance between the quarters was primarily attributable to higher net interest income and slightly lower expenses.

Other comprehensive income:

Other comprehensive income totalled SEK 98 million (201) in Q3. The downturn in long EUR interest rates was larger in Q2 than in Q3, which negatively impacted this item. The item was positively affected by changes in market values in the liquidity portfolio and tighter basis-swap spreads (EUR/SEK) in the quarter. For more information; please refer to page 11.

Trend for January–September 2016 compared with January–September 2015

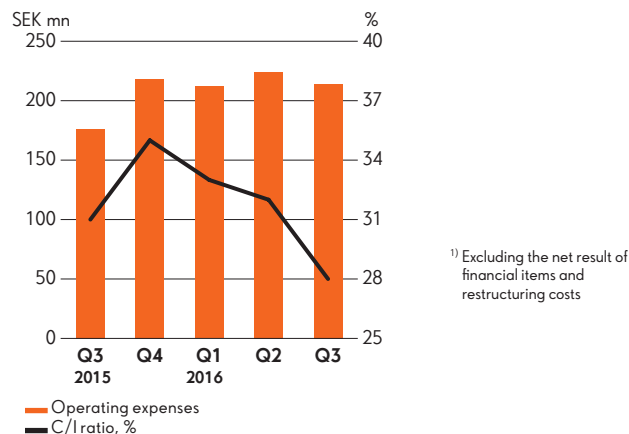

Operating profit totalled SEK 1,463 million (1,090) and to SEK 1,423 million (1,116) excluding the net result of financial items and restructuring costs. Operating income amounted to SEK 2,133 million (1,693). The increases in operating profit and operating income were primarily attributable to higher net interest income. During the period, net interest income rose to

SEK 2,067 million (1,795), driven by lower funding costs. Net commission income was SEK 9 million (expense: 79) and was mainly attributable to the fee to the government stability fund that was recognised under net commissions being replaced by a resolution fee, which is recognised in net interest income. The net result of financial items measured at fair value was SEK 40 million (expense: 23). The difference between the quarters was primarily attributable to the positive effects of changed credit spreads for securities in the trading portfolio, which was partly offset by increased purchases of own bonds. Expenses grew to SEK 650 million (574) for the period. The increase in expenses was mainly attributable to higher personnel, IT and marketing costs. Loan losses remained low and totalled SEK 20 million (29) for the period.

Trend for Q3 2016 compared with Q2 2016

Balance sheet comments

Chargeable treasury bills decreased SEK 6.2 billion to SEK 14.2 billion (20.4) during the quarter. The variance between the quarters stemmed from a smaller Riksbank certificates holding due to the pre-financing ahead of a maturing liability at the end of Q3. During the quarter, lending to credit institutions declined to SEK 7.4 billion (8.7), and bonds and other interest-bearing securities decreased to SEK 52.7 billion (54.6). For information regarding lending to the public, please refer to page 6.

Liabilities to credit institutions increased SEK 7.5 billion to SEK 19.9 billion (12.4) during the quarter. The change between the quarters was mainly attributable to the increased volume of repo funding. At the end of the quarter, subordinated debt totalled SEK 5.9 billion (5.9) and equity increased in line with net income to SEK 15.2 billion (14.7). For information about retail deposits and issued debt securities, please refer to page 6 and the following section "Funding" respectively.

Funding

Q3 was marked by low activity levels in terms of debt issues, which was linked to lower needs for funding.

During the quarter, issued debt securities outstanding decreased to SEK 249.0 billion (268.1). During the quarter, securities were issued for a total of SEK 6.8 billion (15.3) and, in parallel, securities were repurchased for SEK 5.4 billion (4.6) and securities amounting to SEK 21.9 billion (21.9) matured. Alongside changes in premiums/discounts and changes in SEK exchange rates, this resulted in a decrease in issued debt securities of SEK 19.1 billion (9.3) in the quarter.

Funding through the issue of covered bonds is carried out by the wholly-owned subsidiary, SCBC. At the end of the quarter, issued securities outstanding totalled SEK 175.7 billion (191.2).

Liquidity reserve and liquidity risk

SBAB's liquidity reserve comprises liquid, interest-bearing securities with high ratings. Securities holdings are limited by asset class and by country, respectively, and must have a AAA rating on acquisition. At the end of the quarter, the market value of the assets in the liquidity reserve, which primarily comprises chargeable treasury bills, bonds and other interest-bearing securities, amounted to SEK 64.4 billion (74.7). Taking the Riksbank's and the ECB's haircuts into account, the liquidity value of the assets was SEK 61.1 billion (71.4).

SBAB measures and stress tests liquidity risk by calculating the survival horizon, which is an internal metric used to identify how long SBAB will be able to meet its payment obligations without access to capital market funding and net outflows from lending/deposits. The survival horizon totalled 472 (355) days, which the company deems satisfactory.

On 30 September 2016, the liquidity coverage ratio (LCR) under Finansinspektionen's regulation regarding requirements for a liquidity coverage ratio and reporting of liquid assets and cash flows was 191% (256) for all currencies combined, thereby exceeding the minimum requirement of 100%. Measured in SEK, the LCR was 98% (161). According to the European Commission's Delegated Regulation with regard to Liquidity Coverage Requirement for Credit Institutions, at 30 September 2016, the LCR was 268% (287) in all currencies combined, which exceeds the minimum requirement of 70%. When using the same method to measure in SEK, the LCR amounted to 173% (218).

The NSFR (net stable funding ratio), which measures the difference in tenors between commitments and funding, amounted to 116 (121) as interpreted by SBAB.

For further information about the liquidity reserve, the calculation of the survival horizon and the liquidity coverage ratio; please refer to page 17 and Note 9.

Capital adequacy

SBAB primarily recognises credit risk under the internal ratings-based approach (IRB approach) and operational and market risk using the standardised approach. In 2016, the Board of Directors adopted new capital targets for SBAB. According to these new targets, under normal conditions, SBAB's CET1 capital ratio should be at least 1.5 percentage points higher than the CET1 capital requirement communicated by Finansinspektionen. In addition, under normal conditions, SBAB's total capital ratio should be at least 1.5 percentage points higher than the capital requirement communicated by Finansinspektionen. The bank is also tasked with meeting any other regulatory capital requirements.

SBAB's lending rose SEK 2.3 billion in Q3 and totalled SEK 305.0 billion (302.7). The capital requirement was mainly impacted by the increase in lending. The new capital targets are expected to correspond to a CET1 capital ratio of not less than 24.9% and a total capital ratio of not less than 34.8% at 30 September 2016.

At the end of Q3, the CET1 capital ratio amounted to 28.5% (28.4) and the total capital ratio was 46.8% (46.4), which provided a comfortable margin to applicable regulatory requirements. Net profit/loss for the period was not included in own funds while expected dividends reduced own funds.

For more information; please refer to the tables starting on page 14.

CAPITAL ADEQUACY	30 Sep 2016	30 June 2016
CET1 capital ratio, %	28.5	28.4
Tier 1 capital ratio, %	35.9	35.6
Total capital ratio, %	46.8	46.4

OTHER SIGNIFICANT INFORMATION

SBAB participates in the calculation of Stibor

From 26 September 2016, SBAB is participating in the calculation of the Stibor reference rate by reporting data to Nasdaq Stockholm.

Risks and uncertainties

The economic trend in Sweden is the primary risk factor for SBAB's future earnings capacity, and the quality of our assets is mainly exposed to credit risks in the Swedish housing market. The management of interest-rate and currency risks entails some exposure to price risks. Household demand posted a stable trend, underpinned by low inflation, low interest rates and rising stock market and property prices. A housing market with soaring prices and rising household debt means the Swedish economy is sensitive to changes in interest rates and house prices. The risks associated with these factors are expected to increase as long as house prices and debt continue to outpace increases in income. Extensive regulation in the residential mortgage market is another uncertainty factor.

The Swedish economy is susceptible to global economic developments and to conditions in the international financial markets.

On 23 June 2016, a slim majority of British voters passed a referendum saying no to continued membership of the EU (Brexit). Thus far, the outcome of the Brexit referendum has had marginal effect on SBAB, both in terms of market and liquidity risks. The effects are expected to remain marginal, even if it is not possible to exclude longer-term effects.

More information about the Group's risk structure for risk and capital management is available in SBAB's integrated 2015 annual report (pages 60–61 and Note 2 respectively) as well as in the "Information regarding capital adequacy and risk management 2015" report.

Events after the end of the period

Transfer of credits

At the start of 2014, Swedbank entered into an agreement to acquire Sparbanken Öresund, with which SBAB previously had a lending partnership. At the end of Q1 2014, those parts of SBAB's lending for which Sparbanken Öresund had acted as an intermediary amounted to SEK 33 billion. According to the earlier partnership agreement between SBAB and Sparbanken Öresund, the latter, or a party instructed by them, had the right to acquire and redeem the credits covered by the partnership. This has been carried out on an ongoing basis since 2014. On 7 October 2016, SBAB transferred to Swedbank the remaining portion, SEK 12.7 billion, of the credits outstanding that were mediated by Sparbanken Öresund.

Rating

On 21 October, Moody's Investors Service affirmed SBAB's A2 long-term debt and deposit ratings. The ratings outlook was changed to positive from stable. For more information, please refer to sbab.se.

¹⁾ Excess capital has been calculated based on minimum requirements (without buffer requirements)

INTERNALLY ASSESSED CAPITAL REQUIREMENTS

The internal capital adequacy assessment aims to ensure that SBAB has adequate capital to deal with any financial problems that arise. The internally assessed capital requirement for the Group amounted to SEK 13,618 million (SEK 12,565 million at 31 December 2015). SBAB quantifies the capital requirement for its risks using a model for economic capital within the scope of the internal capital adequacy assessment process ("ICAAP"). Economic capital is defined as the amount of capital needed to ensure solvency over a one-year period, given

a predetermined level of confidence. In SBAB's case, the level of confidence is 99.97%, which corresponds to SBAB's long-term AA- target rating (according to Standard & Poor's ratings scale). The internal capital requirement is defined as the higher of economic capital and the regulatory requirements for each type of risk. The table below sets out the internal capital requirement for the consolidated situation, with and without taking into account Finansinspektionen's supervisory practices with regard to the risk-weight floor for Swedish residential mortgages.

		30 September 2016			31 December 2015		
		EXCL. RISK-WEIGHT FLOOR	INCL. RISK-WEIGHT FLOOR		EXCL. RISK-WEIGHT FLOOR	INCL. RISK-WEIGHT FLOOR	
		Internally assessed capital requirement	Internally assessed capital requirement		Internally assessed capital requirement	Internally assessed capital requirement	
		Pillar 1		Pillar 1			
Pillar 1	Credit risk & CVA risk	2,838	2,838	2,672	2,672	2,672	
	Market risk	140	140	149	149	149	
	Operational risk	291	291	239	239	239	
Pillar 2	Credit risk ¹⁾		1,166			1,101	
	Market risk		1,146			1,006	
	Operational risk		75			111	
	Risk-weight floor		0	6,626		0	
	Concentration risk		661	661		562	
	Sovereign risk		62	62		67	
	Pension risk		21	21		21	
Buffers	Income volatility		128			228	
	Capital conservation buffer	1,021	1,021	956	956	956	
	Capital planning buffer ²⁾		1,169	-		1,414	
	Countercyclical buffer	608	608	379	379	379	
Total		4,898	9,327	13,618	4,395	8,905	
						12,565	

¹⁾ In the internal capital requirement without taking the risk-weight floor in to account, additional credit risks in Pillar 2 consist of SBAB's estimated capital requirement in economic capital. Since the additional capital requirement for the risk-weight floor is larger than the additional capital requirement according to economic capital, only the risk-weight floor is included in the internal capital requirement with consideration for the risk-weight floor.

²⁾ The higher of the stress test buffer and the capital planning buffer is included in the internally assessed capital requirement. After taking into account the risk-weight floor, the stress test buffer is calculated without consideration for risk migration in the residential mortgage portfolios and, accordingly, the required buffer is smaller.

LIQUIDITY COVERAGE RATIO

The liquidity coverage ratio calculates the degree to which a bank's liquid assets cover its net cash flows for the coming 30 days in a stressed scenario. Net cash flows comprise contractual inflows and outflows, and theoretical flows based on

historical data, for example, withdrawals of the bank's deposits. The weightings of the theoretical flows are fixed and are determined by the supervisory authority.

Group, SEK million	30 Sep 2016	DISTRIBUTION BY CURRENCY		31 Dec 2015	DISTRIBUTION BY CURRENCY	
		EUR	USD		EUR	USD
Liquidity coverage ratio, %	191	26,757	1,434	232	1,544,051	233
Liquid assets	58,494	11,921	4,672	59,285	12,213	3,723
Assets with 100% weight	25,834	7,676	3,882	26,779	7,715	2,493
Assets with 85% weight	32,660	4,245	790	32,507	4,498	1,230
Cash outflows	35,070	178	860	21,508	3	4,265
Retail deposits	15,373	0	0	11,285	0	0
Market funding	14,442	87	859	7,581	0	4,264
Other outflows	5,254	91	1	2,642	3	1
Cash inflows	12,493	2,112	534	2,273	1,587	2,665
Inflow from retail lending	9,124	0	0	1,821	0	0
Other inflows	3,368	2,112	534	452	1,587	2,665

Liquidity coverage ratio = liquid assets / (cash outflow - cash inflow).

The liquidity coverage ratio is recognised according to the definitions and weights in FFFS 2012:6. The calculation takes into consideration that assets with

85% weight must not constitute more than 40% of the reserve, and that inflows must not exceed 75% of the outflow in each column.

NOTE 1 Accounting policies

The SBAB Group applies the International Financial Reporting Standards (IFRS) as adopted by the EU. In addition to these accounting standards, Finansinspektionen's regulations and general guidelines on annual accounts for credit institutions and securities companies (FFFS 2008:25), the Swedish Annual Accounts Act for Credit Institutions and Securities Companies and the Swedish Financial Reporting Board's recommendation RFR 1 Supplementary Accounting Rules for Groups have been taken into consideration. The Group's interim report fulfils the requirements stipulated under IAS 34, Interim Financial Reporting.

Statutory IFRS is applied for the Parent Company, which means that this interim report has been prepared in compliance with IFRS subject to the additions and exceptions that ensue from the Swedish Financial Reporting Board's recommendation RFR 2 Accounting for Legal Entities, Finansinspektionen's regulations and general guidelines on annual accounts for credit institutions and securities companies (FFFS 2008:25) and the Swedish Annual Accounts Act for Credit Institutions and Securities Companies.

In Q2, SBAB issued bonds that are recognized as additional Tier 1 securities in equity. Interest payments on the instruments are recognized as a deduction from equity at the time of payment.

The accounting policies and calculation methods are unchanged in comparison with the 2015 Annual Report.

According to SBAB's preliminary assessment, new or changed international accounting standards that have been published but not yet applied will have a limited effect on the financial reports. SBAB has initiated a study regarding the implementation of IFRS 9, the application of which will become mandatory from 1 January 2018. This work is proceeding according to plan.

NOTE 2 Net result of financial items measured at fair value/Net result of financial transactions

Group, SEK million	2016	2016	2015	2016	2015	2015
	Q3	Q2	Q3	Jan-Sep	Jan-Sep	Jan-Dec

Fair value recognition

The currency and interest-rate risk inherent in funding conducted in foreign currency is generally hedged throughout the maturity of the funding through currency interest-rate derivatives, known as basis swaps. According to IFRS, all derivative instruments are to be recognised at fair value.

Major variations in fair value between reporting periods could result in significant changes in carrying amounts and hence also in capital adequacy. Changes in the form of losses/gains remain unrealised as long as the basis swap is not closed prematurely.

In cases where the derivative is held to maturity, earnings are not affected by the accumulated changes, as the unrealised interest-rate-related value changes

that affect the performance of each derivative contract starts and ends at zero.

Most of SBAB's basis swaps are held to maturity. An accounting effect also arises in SBAB's securities holding, since the accounting policies that SBAB applies entail that parts of the securities' assets are measured at fair value, while a large portion of SBAB's liabilities are measured at amortised cost. Also in the case of securities assets, the unrealised interest rate-related value changes that affect the result will be recovered over the remaining tenor, if the asset is held to maturity and the issuer is able to make its payments. Most of SBAB's securities are held to maturity. Most of SBAB's securities are held to maturity.

¹⁾ The distributed income includes net interest income, net commissions and other operating income

²⁾ The distributed income includes personnel costs, other expenses and depreciation of tangible and intangible assets.

The comparative figures for 2015 have been recalculated to reflect the organisational change that took effect in Q2 2016. The Retail operating segment includes the Retail Market and the Partner Market, which were previously reported as separate operating segments, and Booli, which was acquired in Q1 2016. The Partner Market ceased to exist as a profit centre in conjunction with the organisational change.

Return on equity, %, is expressed as operating profit after tax (for operating segments, a standardised tax of 22% is applied) in relation to average equity, adjusted for additional Tier 1 securities.

Fair value measurement of financial instruments

The measurement policies for financial instruments recognised at fair value in the balance sheet are provided in Note 1 Accounting Policies in the 2015 Annual Report. In the "Total fair value" column above, information is also provided on the fair value of financial instruments that are recognised at amortised cost in the balance sheet. The carrying amounts for current receivables and liabilities have

been assessed as equal to their fair values. For "Lending to the public," where no observable credit margin data is available at the time of measurement, the credit margin on the most recent stipulated date of expiry is applied, Level 3. Issued debt securities are measured at the Group's current borrowing rate, Level 2.

¹⁾ The item "Other derivatives" consists of derivatives included in the hedge accounting

The measurement policies for financial instruments recognised at fair value in the balance sheet are provided in Note 1 Accounting Policies in the 2015 Annual Report. In the table, financial assets and liabilities recognised at fair value in the balance sheet are divided on the basis of the measurement levels used below. No transfers were made between levels in 2016.

Quoted market prices (Level 1)

Measurement at quoted prices in an active market for identical assets and liabilities. A market is deemed to be active if the price data is easily accessible and corresponds to actual regularly occurring transactions. The measurement method is used for holdings of quoted interest-bearing securities and for publicly quoted derivatives, primarily interest-rate futures.

Measurement based on observable data (Level 2)

Measurement aided by external market information other than quoted prices included in Level 1, such as quoted interest rates or prices for closely related instruments. This group includes all non-quoted derivatives.

Measurement based in part on unobservable data (Level 3)

Measurement whereby a material component of the model is based on estimates or assumptions that do not originate directly from the market. This method is currently not used on any asset or liability.

NOTE 9 Liquidity reserve and liquidity risk

The assets in SBAB's liquidity reserve comprises liquid, interest-bearing securities with high rating and form an integrated part of the Group's liquidity risk management. Securities holdings are limited by asset class and by country, respectively,

and must have a AAA rating on acquisition. In addition to these collective limits, limits for individual issuers may also be set. The table is reported according to the Swedish Bankers' Association's template for liquidity reserve disclosures.

Calculation of survival horizon

SBAB measures and stress-tests liquidity risk, for example, by calculating the survival horizon. This is done by totalling the maximum need of liquidity for each coming day and comparing this to the size of the liquidity portfolio after applicable haircuts. The calculations are based on a crisis scenario in which all loans are

assumed to be extended on maturity, meaning that no liquidity is added through loan redemption, and where no funding is available. Accordingly, the maximum need for liquidity can be identified for every given future period, and the necessary liquidity reserve can be established.

PARENT COMPANY

Trend for January–September 2016 compared with January–September 2015

The operating profit amounted to SEK 147 million (loss: 95) for the period. The change in operating profit was mainly attributable to improved net income from financial transactions, which amounted to SEK 69 million (expense: 75) for the period, higher net interest income and an increase in other operating income, comprising the outsourcing fee paid by the subsidiary SCBC for the administrative services performed by SBAB. Net interest income amounted to SEK 184 million (134).

Net income from financial transactions amounted to SEK 69 million (expense: 75). The increase was mainly attributable to unrealised market value changes as a result of changed credit spreads for securities held in the trading portfolio. Expenses totalled SEK 640 million (574), driven by higher IT, marketing and personnel costs. The net effect of loan losses was SEK 12 million (29). Lending to the public increased in the period to SEK 60.4 billion (66.4) and Retail deposits increased to SEK 93.4 billion (71.5). The CET1 capital ratio was 22.9% (22.8) and the internally assessed capital requirement was SEK 5,466 million (4,231).

¹⁾ Excess capital has been calculated based on minimum requirements (without buffer requirements)

NOTE 10 Lending to credit institutions

Of the Parent Company's lending to credit institutions, SEK 50,485 million relates to a receivable from the wholly owned subsidiary AB Sveriges Säkerställda Obligationer (publ) (Swedish Covered Bond Corporation, SCBC), compared with SEK 14,920 million at the end of 2015. This receivable is subordinated in the event of receivership or liquidation, which means that payment is received only after other creditors of the subsidiary have been paid.

Financial calendar

Year-end report 2016	8 February 2017
Interim report January–March 2017	25 April 2017
Interim report January–June 2017	19 July 2017
Interim report January–September 2017	26 October 2017
Year-end report 2017	9 February 2018

SBAB's Annual General Meeting will be held on 25 April 2017 in Solna.

The information in this report is such that SBAB Bank AB (publ.) is obligated to disclose in accordance with the Swedish Financial Instruments Trading Act and the Swedish Securities Market Act, as well as in the guidelines contained in the Swedish Government's ownership policy and the guidelines for companies in which the Government is an owner. The information was submitted for publication on 28 October 2016 at 8:00 a.m. (CET).
