

New jobs: Solutions 30 is searching for 400 additional technicians in Europe, including 300 technicians in France

30 Solutions, the European leader in installation and maintenance of new technologies, plans to hire 400 additional employees during the current calendar to be prepared for the strong growth in the key markets of digital Europe.

In France, around 300 technicians with the degree „Bac + 2“ shall be hired, receiving an advanced training by the group's own training unit, "PC 30 School".

300 additional engineers in France to ensure the growth of the Group

30 Solutions is growing with average growth rates of more than 20 percent per year since its inception in 2003. For the current year its management predicts further profitable growth in the double digits.

In order to maintain these growth rates, Solutions 30 is looking for additional 400 employees: 100 of them in Germany, Italy, the Netherlands and Belgium and 300 in France, where about one-third of the new jobs in the Paris region and two thirds in the rest of the country.

Profile of the new employees: Young graduates with Bac + 2 degree, technical studies and a good understanding of how to deal with customers (service idea)

The new employees of Solutions 30 should be young graduates with Bac + 2 degree, technical studies and a good Verständnis for dealing with customers (service idea).

The job profile of Solutions 30 is not limited to the purely technical implementation. There is a direct contact between the technician with the end user, whether at retail or business customer level. It is therefore important to establish a healthy relationship with the customer and to enable them to access new technologies.

For the further education of its employees Solutions uses 30 his own training unit, "PC 30 School". The various modules and training sessions at school help new employees in becoming real "technicians of the future".

The technicians of Solutions 30 will therefore be able to install and maintain the more and more existing digital technologies in an increasingly complex environment (Internet boxes, home automation, interacting devices, payment systems, optical fiber, etc.) while the user needs a fast and efficient support as he relies more and more on those new technologies.

The growth of the group continues in key markets

30 Solutions specializes in the installation, maintenance and support in the use of new technologies for individuals and businesses. Since inception in 2003, the company has developed with the rhythm of a dynamically growing market.

The company started in the field of IT support and telecommunications, and has in the course of time expanded its range to digital TV, smart meters, new payment methods and security solutions and home automation.

Meanwhile, Solutions 30 executes more than 4,000 interventions per day in six different countries. The Group generates more than 100 million euros in sales per year and employs a network of approximately 1,500 fixed technicians.
