IT – Nasdaq Web Systems – Decommissioning of SafeNet tokens (04/19)

As previously announced, Nasdaq will decommission SafeNet's 2FA solution.

Users of Q-Port, CMS Web, TRACK and NFM that still log in with a SafeNet token are from now on prompted with a pop-up request to enroll to another 2FA method in the Service Center Portal.

Although SafeNet tokens will still be available for a period, Nasdaq highly recommends to change 2FA method as soon as possible in order to guarantee continued access to the web systems.

2FA webpage

General information regarding two-factor authentication (2FA) as well as direct links to the Service Portal and related applications can be found on our 2FA webpage.
