

PRESS RELEASE

Enea® OSE selected for LTE base stations in Asia

STOCKHOLM, Sweden, September 27, 2016 – Enea® (NASDAQ OMX Nordic:ENEA) has extended a license agreement with a global information and communication technology company in Asia. The agreement, worth 776 kUSD (6.6MSEK), concerns the Enea® OSE 64-bit operating system, for intended use in the customer's LTE macro base stations.

As the world leading vendor of operating systems for radio base stations, Enea continues to serve its customers combinations of proprietary and open-source software solutions, addressing the ever increasing demands on security and availability. Enea® OSE is a robust, high-performance real-time operating system optimized for multi-core and multi-processor systems, enabling the customer to utilize the full capability of modern 64-bit multicore processors.

"This customer selected Enea OSE in competition with other proprietary embedded operating systems, thanks to its performance and scalability on multicore processors," said Anders Lidbeck, President and CEO, Enea. "We are thrilled to see a stronger commitment in our business relationship, and that we are expanding our engagement into new strategic areas with this customer."

This is information of the type that Enea AB (publ) is obligated to disclose in accordance with the Swedish Securities Markets Act and/or the Financial Instruments Trading Act. The information was submitted for publication on September 27, 2016 at 08:00 CET.
