Linköping, April 26, 2010

Sectra sells Synthetic MRI application to Switzerland

Sectra has secured the first order for the software SyMRI Suite from the Institute of Forensic Medicine at the University of Bern. The software will enhance quality in conjunction with virtual autopsies.

“SyMRI Suite provides us with increased safety and higher efficiency in our work,” says Professor Michael Thali, head of the Institute of Forensic Medicine at the University of Bern.

The University of Bern is the first of a handful of pilot customers that have chosen to purchase the software, which is used together with Sectra PACS workstations, thereby providing radiologists with a more efficient workflow.

“We focus on offering our customers powerful clinical applications and foresee major potential for SyMRI Suite,” says Per Elmhester, Product Manager Clinical Solutions at Sectra.

The SyMRI Suite was rolled out at the beginning of 2010. The software for synthetic magnetic resonance (MR) helps hospital personnel to drastically reduce the time required per patient for MR examinations, thus increasing the availability of the MR equipment. In addition, tissue can be quantified, identified and its volume determined. SyMRI Suite is developed by Sectra’s partner Synthetic MR.

MR examinations have increased steadily since the 1980s. MR technology is effective in cases involving tumors, aneurysms, examining the condition of organs as the heart, liver, kidneys and brain and in different soft tissue.

About Sectra’s medical operations

Sectra develops and sells IT-systems and products for radiology, mammography and orthopedics. More than 1,000 hospitals, clinics and imaging centers worldwide use the systems daily, together performing over 50 million radiology examinations annually. This makes Sectra one of the world-leading companies within systems for handling digital radiology images. In Scandinavia, Sectra is the market leader with more than 50% of all film-free installations. Sectra’s systems have been installed in North America, Scandinavia and most major countries in Europe and the Far East.

About the Sectra Group

Sectra successfully develops and sells cutting-edge products in the expansive niche segments of medical systems and secure communication systems. The company was founded in 1978 and has its roots in Linköping University in Sweden. Today, Sectra has offices in twelve countries and operates through partners worldwide. Sales in the 2008/2009 fiscal year totaled SEK 863 million. The Sectra share is quoted on the NASDAQ OMX Stockholm AB exchange. For more information, visit www.sectra.com.

About SyntheticMR AB

SyntheticMR AB develops analytical and imaging methods for synthetic magnetic resonance (MR). Synthetic MR helps hospital personnel to drastically reduce the time required for MR imaging, thus increasing the availability of the MR equipment. Other advantages of synthetic MR
