Main activities of SC Klaipedos nafta (hereinafter - the Company)

- Oil terminal
- LNG terminal
- Subačius fuel storage facility
- LNG small-scale activities

| Current activities | Planned activities |
Mission – Ensure reliable and effective supply of LNG and transhipment of oil products

Vision – Reliable operator of oil products and LNG terminals that adds value through implemented projects and balanced expansion

VALUES
- Proactivity
- Professionalism and reliability
- Transparency
- Social Responsibility
General strategic objectives

1. Increasing value of the Company
2. Growth and diversification
3. Improvement of internal processes
4. Development of competences
5. Secure and reliable operations

Strategic objectives for Company’s activities

**Oil terminal**
- Increase awareness and attractiveness to the owners of oil products
- Improve flexibility and capacity of oil transshipment
- Enlarge the scope of activities and services provided
- Ensure safe operation of the oil terminal

**LNG terminal**
- Provide an alternative source for the supply of natural gas to Lithuania
- Assure minimal exploitation expense for the consumers of natural gas
- Develop services related to the activities of LNG terminal

**LNG small scale**
- Create small scale LNG infrastructure

**Long term fuel storage facilities**
- Proper storage of national reserve of oil products
- Increase long term storage capacity and volume of the activity
- Develop regional LNG market
The significant events of the 4th quarter of 2015

- **18 November 2015.** The Company and the port of Helsingborg (Helsingborg, Sweden) have signed partnership agreement regarding cooperation in the project HEKLA – Helsingborg & Klaipeda LNG Infrastructure Facility Deployment. According to this agreement the Company acquires the right to use the financial support of EUR 6 million of the Connecting Europe Facility (CEF, part of the EU financing program) approved by Coordination Committee for the construction of SC Klaipėdos Nafta Liquefied natural gas onshore reloading station.

- **20 November 2015.** The Board of AB Klaipėdos Nafta took a decision to perform activities of operating a liquefied natural gas bunkering carrier and to establish UAB SGD logistika, a wholly owned subsidiary of AB Klaipėdos Nafta, for performance of such activities.

- **24 November 2015.** UAB “SGD logistika”, which is a wholly-owned subsidiary of AB Klaipėdos Nafta, signed a joint venture agreement with partner Bomin Linde LNG GmbH & Co. KG on joint performance of the activities of operating the LNG bunkering carrier.

- **30 November 2015.** The National Commission for Energy Control and Prices implementing the changes of the Liquified natural gas terminal law, made decisions on adjusting LNG terminal supplement tariff for 2016 comprising 510.16 Eur/(MWh/day/year), in which the regasification tariff ceiling fixed part (used for the Companys’ LNG terminal financing) comprise 259.84 Eur/(MWh/day/year).

- **9 December 2015.** The Company has decreased the amount of the Credit Agreement which was signed on 27 November 2014 with the Nordic Investment Bank (hereinafter, the “NIB”) from 34.8 EUR thousand to 22.0 EUR thousand and prolonged the availability period to use the credit until 31 December 2016.
Oil terminal characteristics

Railway
- 2 tracks for light oil products - LFO (total 60 tank-cars)
- 2 tracks for heavy oil products - HFO (total 64 tank-cars)
- One of the tracks is universal: can load both HFO and LFO
- Two four-track railway trestles provide a possibility to discharge or load 124 tank-cars simultaneously.

Storage tank farm
- Total 28 tanks
- ~ 450 cub. m thousand total volume (plus in Subacius FS ~ 340 cub. m thousand )

Biological Waste Water Treatment Facilities
- Waste water collected and treated annually up to 400 cub. m thousand (160 m³/h)

2 Jetties
- Depth: 14 m
- Length: 270 each
- Harbour entrance depth: 14.5 m
- Tanker batch: up to 100,000 t with 12.5 m allowable draught

Auto tankers loading system
- Service to import gasoline and diesel by tankers for the Lithuanian market needs
- 4 loading points at the same time
LNG terminal infrastructure

LNG terminal: the first LNG terminal in the Baltic states, which comprise of the LNG floating storage and regasification unit – FSRU (170,000 thousand m³), jetty (450 m length), pipeline (18 km) and gas metering station. LNG to the terminal are delivered by the vessels - LNG carriers.

FSRU
Leaser:
Höegh LNG Limited

LNG Jetty with equipment

Connecting pipeline with main gas pipeline

18 km
Gas metering station

LNG to the terminal are delivered by the vessels - LNG carriers.
LNG terminal floating storage regasification unit (FSRU) technical parameters

- **Regas capacity**: 11 mln. m$^3$/d
- **Storage capacity**: 170,000 m$^3$
- **Length**: 294 m
- **Height**: 45 m
- **Height**: 12.6 m
SC Klaipėdos nafta transhipment of oil products in 2011 – 2015 years

Average transhipment for the last 5 years – 6.5 million tones

Transhipment of Orlen Lietuva products (% of the total transhipment)
Key operating figures

Oil terminal transhipment volume

Transhipment volume increase by 15.6 % (from 5,587 thousand tons in 2014 to 6,461 thousand tons in 2015).

The main reasons:
- Due to the favourable changes in macroeconomics conditions SC Orlen Lietuva (OL) increased refinery volume and transhipment through the Company’s terminal. Total OL transhipment increased by 17.9%.
- The Company has expanded the range of clients and attracted additional petroleum products from Belorussia refineries that increased transhipment volume of transit freights (including light petroleum products).

LNG terminal regasification volume

In Company’s LNG terminal in 2015:
- Accepted 5 LNG carriers which delivered 318,561 thousand tons LNG
- Regasified and transmitted to the natural gas transmission system
  - 4,559 thousand MWh natural gas
  (this activity started to be carried out on 27 November 2014).

# Investments

## The main directions of the investments of the Company:

- To increase the oil terminal's flexibility in accepting different types of oil products;
- To ensure the compliance with environmental and fire safety requirements;
- The implementation of the LNGT Project and assurance of the smooth activity of the terminal.
- **Construction of the onshore LNG reloading station**

Total investments into the non-current assets in 2015 comprise EUR 6.8 million. The major part of investments were allocated to the finalizing works of the construction of the LNG terminal infrastructure.

## In 2015 approved the most significant investment projects

- In the extraordinary shareholders meeting held on the 25th of August, 2015 the decisions regarding new investments approval were adopted:
  
  A. To implement the LNG on-shore reloading station project which value is Eur 27.17 million; for more information about the project see below;
  
  B. To implement the light petroleum products reservoirs expansion project with a value of Eur 9.55 million. This project include construction of the additional reservoirs with the total capacity of 20.6 thousand m³ and technological expansion of the auto tankers loading system. This investments shall give a competitive advantage for the oil terminal of the Company.

## LNG onshore reloading station project

Upon evaluating the market changes, relating to the LNG consumption possibilities and having in mind the necessity to utilize the LNG terminal’s potential, SC Klaipėdos Nafta commenced the development of a new infrastructure project – an LNG distribution station, which is planned to be constructed on the territory of the Company’s oil terminal. The planned maximum capacity of the LNG distribution station is about 5,000 m³.

On 12 February 2016 the EPC contract was signed with the consortium, consisting of Lithuanian – German company PPS Pipeline Systems GmbH and Czech company Chart Ferox, a.s. The EPC contact will enter into effect after approval by the Board and the General Meeting of Shareholders of the Company.

It is planned that the partial operation of the distribution station will commence in 15 months after the date of entering into effect of the contract and all the works will be completed in autumn of 2017. The contract foresees the possibility to extend it for the time period up to 14 months (up to 12 months due to the territorial planning procedures, which are likely to protract and 2 months – due to other reasons).
Achievements and awards

- On the 22nd of the January 2015 in the annual Baltic Market Awards (BMA), organized by the Nasdaq, Klaipėdos nafta became the winner in the category “The Most Visible Improvement over the Year” and was invited to ring the Opening Bell at Nasdaq Market Site in Times Square, New York by Bob Greifeld, CEO of Nasdaq.

- On the 28th of January, 2015 At the 8th annual European Gas Conference 2015, in Vienna, Klaipeded nafta won the Project of the Year award for the implementation of the Liquefied Natural Gas (LNG) Terminal project. Company was one of four nominees among such well-known companies like Shell and Total Gas & Power.

- During the Transport Week, one of the most important transport events in Central and Eastern Europe, took place on March 17-19th 2015 in Gdańsk, Poland, the Company was awarded the Baltic Trendsetters Club Certificate for developing the floating LNG terminal Independence and rearranging the Baltic's gas market through one ship call.

- On the 6th of November 2015 Klaipedos nafta received a sign of the Lithuanian Police Commissioner General for the active activity in prevention of the crimes and cooperation implementing preventive projects.

- Klaipedos nafta oil terminal at the 10th crude oil, LPG and petroleum product congress held in the end of November 2015, in St. Petersburg, Russia, was awarded the Grand Prix 2015, meaning that Company's terminal acts as the industry's model in terms of overall performance.
Since 2003 the shares of the Company are listed on NASDAQ OMX Vilnius stock exchange:
- ISIN code – LT0000111650
- Abbreviation – KNF1L

As at 31 December 2015 all the shares of the Company were owned by 1,847 shareholders (on 31 December 2014 – 1,871)
